Axiom Diversified Monthly Income Portfolio

Supplemental Schedule to Schedule of Investment Portfolio

Offsetting Arrangements (note 2d)

The Portfolio may enter into various master netting arrangements or other similar agreements that do not meet the criteria for offsetting in the Statements of Financial Position but still allow for the related amounts to be set off in certain circumstances, such as bankruptcy or the termination of the contracts.

As at August 31, 2018 and 2017, the Portfolio did not enter into any arrangements whereby the financial instruments were eligible for offset.

Interest in Underlying Funds (note 4)

The following table presents additional information on the Portfolio's investments in Underlying Funds where the ownership interest exceeds 20% of each Underlying Fund as at August 31, 2018 and 2017:

As at August 31, 2018

Holding	% of Net Assets	Country of Establishment & Principal Place of Business	% of Ownership Interest
Renaissance Equity Income Private Pool	36.5	Canada	40.1

As at August 31, 2017

Holding	% of Net Assets	Country of Establishment & Principal Place of Business	% of Ownership Interest
Renaissance Equity Income Private Pool	37.2	Canada	42.3

Axiom Diversified Monthly Income Portfolio

Financial Instrument Risks

Investment Objective: Axiom Diversified Monthly Income Portfolio (the *Portfolio*) seeks to achieve a mix of high current income and some long-term capital growth by investing primarily in a diversified portfolio of income and bond mutual funds, along with equity mutual funds (its *Underlying Funds*).

Investment Strategies: The portfolio advisor has established a long-term strategic asset mix weighting for the Portfolio with, under normal market conditions, an asset mix of fixed income (25-55%) and equities (45-75%). The portfolio advisor may review and adjust the asset mix, in its sole discretion, depending on economic conditions and relative value of income and equity securities. The Portfolio will utilize strategic and tactical asset allocation strategies that will:

- invest up to 100% of the Portfolio's assets in units of its Underlying Funds managed by the Manager or one of its affiliates;
- allocate the Portfolio's assets among the Underlying Funds according to the asset mix determined by the portfolio advisor and monitor, review, and periodically rebalance or modify the Portfolio's asset mix, change the percentage holdings of any Underlying Fund, and add or remove any Underlying Fund at the portfolio advisor's sole discretion.

As the Portfolio invests in the Underlying Funds, it may be indirectly exposed to concentration, credit, currency, and interest rate risks from these holdings. Only direct exposure to significant risks that are relevant to the Portfolio is discussed here. General information on risk management and specific discussion on concentration, credit, currency, interest rate, liquidity, and other price/market risk can be found in note 2 of the financial statements.

In the following risk tables, Net Assets is defined as meaning "Net assets attributable to holders of redeemable units".

Concentration Risk as at August 31, 2018 and 2017

The Schedule of Investment Portfolio presents the securities held by the Portfolio as at August 31, 2018.

The following table presents the investment sectors held by the Portfolio as at August 31, 2017, and groups the securities by asset type, industry sector, geographic region, or currency exposure:

As at August 31, 2017

Portfolio Breakdown	% of Net Assets
Mutual Funds	
Canadian Bond	40.0
Canadian Equity	56.0
U.S. Equity	5.0
Other Assets, less Liabilities	(1.0)
Total	100.0

Credit Risk

Credit ratings represent a consolidation of the ratings provided by various outside service providers and are subject to change, which could be material.

See the Schedule of Investment Portfolio for counterparties related to over-the-counter derivative contracts, where applicable.

As at August 31, 2018 and 2017, the Portfolio had no significant investments in debt securities.

Currency Risk

As at August 31, 2018 and 2017, the Portfolio did not have a significant exposure to currency risk.

Interest Rate Risk

As at August 31, 2018 and 2017, the majority of the Portfolio's financial assets and liabilities are non-interest bearing and short-term in nature; accordingly, the Portfolio is not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Liquidity Risk

Liquidity risk is the risk that the Portfolio will encounter difficulty in meeting obligations associated with financial liabilities. The Portfolio is exposed to daily cash redemptions of redeemable units. The Portfolio maintains sufficient cash on hand to fund anticipated redemptions.

With the exception of derivative contracts, where applicable, all of the Portfolio's financial liabilities are short-term liabilities maturing within 90 days after the period end.

For portfolios that hold derivative contracts with a term-to-maturity that exceeds 90 days from the period end, further information related to those contracts can be referenced in the derivative schedules following the Schedule of Investment Portfolio.

Other Price/Market Risk

The table that follows indicates how net assets as at August 31, 2018 and 2017 would have increased or decreased had the value of the Portfolio's benchmark(s) increased or decreased by 1%. This change is estimated based on the historical correlation between the return of Class A units of the Portfolio as compared to the return of the Portfolio's benchmark(s), using 36 monthly data points, as available, based on the monthly net returns of the Portfolio. This analysis assumes that all other variables remain unchanged. The historical correlation may not be representative of the future correlation and, accordingly, the impact on net assets could be materially different.

Benchmark	Impact on Net Assets (\$000s)	
	August 31, 2018	August 31, 2017
FTSE Canada Universe Bond Index	617	713
S&P/TSX Composite Dividend Index	703	820
40% FTSE Canada Universe Bond Index 36.6% S&P/TSX Composite Dividend Index 18.4% S&P/TSX Composite Index 5% S&P 500 Index	1,342	1,512

Fair Value Measurement of Financial Instruments

The following is a summary of the inputs used as at August 31, 2018 and 2017 in valuing the Portfolio's financial assets and financial liabilities, carried at fair value:

As at August 31, 2018

Classification	Level 1 (i) (\$000s)	Level 2 (ii) (\$000s)	Level 3 (iii) (\$000s)	Total (\$000s)
Financial Assets				
Mutual Funds	144,876	—	—	144,876
Total Financial Assets	144,876	—	—	144,876

(i) Quoted prices in active markets for identical assets

(ii) Significant other observable inputs

(iii) Significant unobservable inputs

As at August 31, 2017

Classification	Level 1 (i) (\$000s)	Level 2 (ii) (\$000s)	Level 3 (iii) (\$000s)	Total (\$000s)
Financial Assets				
Mutual Funds	161,320	—	—	161,320
Total Financial Assets	161,320	—	—	161,320

(i) Quoted prices in active markets for identical assets

(ii) Significant other observable inputs

(iii) Significant unobservable inputs

Transfer of assets between Level 1 and Level 2

Financial assets and liabilities transferred from Level 1 to Level 2 are the result of securities no longer being traded in an active market.

For the periods ended August 31, 2018 and 2017, there were no transfers of financial assets and liabilities from Level 1 to Level 2.

Financial assets and liabilities transferred from Level 2 to Level 1 are the result of securities now being traded in an active market.

For the periods ended August 31, 2018 and 2017, there were no transfers of financial assets and liabilities from Level 2 to Level 1.

Axiom Diversified Monthly Income Portfolio

Reconciliation of financial asset and liability movement – Level 3

The Portfolio did not hold any Level 3 investments at the beginning of, during, or at the end of either reporting period.

Notes to Financial Statements

As at and for the periods as disclosed in the financial statements (see note 1)

1. Axiom Portfolios — Organization of the Portfolios and Financial Reporting Periods

The Axiom Portfolios consist of Axiom Balanced Income Portfolio, Axiom Diversified Monthly Income Portfolio, Axiom Balanced Growth Portfolio, Axiom Long-Term Growth Portfolio, Axiom Canadian Growth Portfolio, Axiom Global Growth Portfolio, Axiom Foreign Growth Portfolio, and Axiom All Equity Portfolio.

Each of the Axiom Portfolios (individually, a *Portfolio*, and collectively, the *Portfolios*) is a mutual fund trust, except Axiom Foreign Growth Portfolio, which is a unit trust, organized under the laws of Ontario and governed by a declaration of trust (*Declaration of Trust*). The address of the Portfolios' registered office is 18 York Street, Suite 1300, Toronto, Ontario.

The Portfolios are managed by CIBC Asset Management Inc. (the *Manager*). The Manager is also the trustee, registrar, portfolio advisor, and transfer agent of the Portfolios. Each Portfolio may issue an unlimited number of classes of units and an unlimited number of units of each class. On July 21, 2017 the Manager closed certain classes of units of the Portfolios to all purchases and were subsequently terminated on October 13, 2017. On September 1, 2017, the Manager also closed other classes of units to all purchases. The following tables outline the classes of units available for sale as of the date of these financial statements, the classes of units that were closed to purchases as of September 1, 2017 and the classes of units that were closed to purchases on July 21, 2017 and terminated on October 13, 2017:

Classes of Units Available for Sale:

Portfolios	Class A	Class T4	Class T6	Class F	Class FT4	Class FT6	Class O
Axiom Balanced Income Portfolio	✓	✓	✓	✓	✓	✓	✓
Axiom Diversified Monthly Income Portfolio	✓		✓	✓		✓	✓

Axiom Foreign Growth Portfolio	✓	✓	✓	✓	✓	✓	✓	✓	✓
Axiom All Equity Portfolio	✓	✓	✓	✓	✓		✓	✓	✓

In the future, the offering of any classes of a Portfolio may be terminated or additional classes may be offered.

Each class of units may charge a different management fee. Operating expenses can either be common or class-specific. Class-specific expenses are allocated on a class-by-class basis. As a result, a separate net asset value per unit is calculated for each class of units.

Class A, T4, and T6 units are available to all investors on a load basis. Investors may pay a sales commission when purchasing Class A, T4, and T6 units of the Portfolios or may pay a deferred sales charge if they redeem their Class A, T4, and T6 units. They may have to pay a short-term trading fee, if applicable. Class A, T4, and T6 units have a minimum investment requirement of \$500.

Class T4, T6, and T8 units have the same characteristics as Class A units, except that they each intend to pay a unique maximum fixed distribution amount per unit, which also results in a separate net asset value per unit. Select-T4, Select-T6, and Select-T8 Class units are the same as Select Class units, except that they each intend to pay a unique maximum fixed distribution amount per unit. Elite-T4, Elite-T6, and Elite-T8 Class units are the same as Elite Class units, except that they each intend to pay a unique maximum fixed distribution amount per unit.

Class F, FT4 and FT6 units are available to investors participating in programs that do not require the payment of sales charges by investors and do not require the payment of service fees or trailing commissions to dealers. For these investors, the Manager "unbundles" the typical distribution costs and charges a lower management fee. Potential investors include clients of "fee-for-service" investment advisors, dealer-sponsored "wrap accounts", and others who pay an annual fee to their dealer instead of transactional sales charges and where the dealer does not receive service fees or trailing commissions from the Manager. Class FT4 and FT6 units have the same characteristics as Class F units, except that they each intend to pay a unique maximum fixed distribution amount per unit, which also results in a separate net asset value per unit.

Class O units are only available to select investors who have been approved by and have entered into a Class O unit account agreement with the Manager or whose dealer or discretionary manager offers separately managed accounts or similar programs and has entered into a Class O unit account agreement with the Manager. These investors are typically financial services companies, including the Manager, which use Class O units of the Portfolios to facilitate offering other products to investors. No management fees or operating expenses are charged to the Portfolios in respect of Class O units held; instead, a negotiated management fee is charged by the Manager directly to, or as directed by, Class O unitholders or dealers or discretionary managers on behalf of unitholders.

The date upon which each Portfolio was established by Declaration of Trust (*Date Established*) and the date upon which each class of units of each Portfolio was first sold to the public (*Inception Date*) are reported in footnote *Organization of the Portfolio* on the Statements of Financial Position.

The Schedule of Investment Portfolio of each Portfolio is as at August 31, 2018. The Statements of Financial Position are as at August 31, 2018 and August 31, 2017. The Statements of Comprehensive Income, Statements of Changes in Net Assets Attributable to Holders of Redeemable Units and Statements of Cash Flows are for the years ended August 31, 2018 and August 31, 2017, except for Portfolios or classes established during either period, in which case the information presented is from the Date Established or the Inception Date to August 31, 2018 and August 31, 2017.

These financial statements were approved for issuance by the Manager on November 1, 2018.

2. Summary of Significant Accounting Policies

These financial statements have been prepared in accordance with International Financial Reporting Standards (*IFRS*) as published by the International Accounting Standards Board (*IASB*).

The financial statements have been prepared on a going concern basis using the historical-cost convention. However, each Portfolio is an investment entity and primarily all financial assets and financial liabilities are measured at fair value in accordance with *IFRS*. Accordingly, the Portfolios' accounting policies for measuring the fair value of investments and derivatives are consistent with those used in measuring the net asset value for transactions with unitholders. In applying *IFRS*, these financial statements include estimates and assumptions made by management that affect the reported amounts of assets, liabilities, income, and expenses during the reporting periods. However, existing circumstances and assumptions may change due to market changes or circumstances arising beyond the control of the Portfolios. Such changes are reflected in the assumptions when they occur.

These financial statements have been presented in Canadian dollars, which is the Portfolios' functional currency (unless otherwise noted).

a) Financial Instruments

Classification and recognition of financial instruments

In accordance with *IAS 39* Financial Instruments: Recognition and Measurement, financial assets and financial liabilities are classified at initial recognition into the following categories:

Financial assets and liabilities at fair value through profit or loss (FVTPL)

This category is sub-divided into:

- Financial instruments classified as Held For Trading: Financial assets and liabilities are classified as Held For Trading if they are acquired for the purpose of selling and/or repurchasing in the near term, and are acquired principally for the purpose of generating a profit from short-term fluctuations in price. Derivatives and securities sold short held by the Portfolios are classified as Held For Trading and do not meet the definition of effective hedging instruments as defined by *IAS 39*.
- Financial instruments designated as FVTPL at inception: All investments held by the Portfolios, excluding those classified as Held For Trading (discussed above), are designated as fair value through profit or loss upon initial recognition. These financial assets are designated upon initial recognition on the basis that they are part of a group of financial assets that are managed and have their performance evaluated on a fair value basis, in accordance with risk management and investment strategies of the Portfolios, as set out in the Portfolios' simplified prospectus.

Loans and receivables

The Portfolios include in this category, receivable balances relating to portfolio investments and other short-term receivables such as receivable for units issued.

Other financial liabilities

This category includes all financial liabilities, other than those classified as fair value through profit or loss. The Portfolios include in this category, amounts relating to payables for portfolio securities purchased and other accrued liabilities such as payable for units redeemed and distributions payable to holders of redeemable units.

All Portfolios have contractual obligations to distribute cash to the unitholders. As a result, the Portfolios' obligation for net assets attributable to holders of redeemable units represents a financial liability and is presented at the redemption amount.

b) Risk Management

The Portfolios' overall risk management approach includes formal guidelines that govern the extent of exposure to various types of risk, including diversification within asset classes and limits on the exposure to individual investments and counterparties. The Manager also has various internal controls to oversee the Portfolios' investment activities, including monitoring compliance with the investment objective and strategies, internal guidelines, and securities regulations. Please refer to each Portfolio's Supplemental Schedule to Schedule of Investment Portfolio for specific risk disclosures.

Fair value measurement of financial instruments

Financial instruments are valued at their fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Refer to notes 3a to 3c for valuation of each specific type of financial instruments held by the Portfolios. The fair value of financial assets and liabilities traded in active markets are based on quoted market prices at the close of trading on the reporting date. The Portfolios use the last traded market price for both financial assets and financial liabilities where the last traded price falls within that day's bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances.

For financial assets and financial liabilities that are not traded in an active market, fair value is determined using valuation techniques.

The Portfolios classify fair value measurement within a hierarchy which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and

Level 3: Inputs are unobservable for the asset or liability.

If inputs are used to measure an asset's or liability's fair value, the classification within the hierarchy is based on the lowest level input that is significant to the fair value measurement. Each Portfolio's fair value hierarchy classification of its assets and liabilities is included in the Supplemental Schedule to Schedule of Investment Portfolio.

The carrying values of all non-investment assets and liabilities approximate their fair values due to their short-term nature. Fair values are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3.

The Manager is responsible for performing the fair value measurements included in the financial statements of a Portfolio, including the Level 3 measurements. The Manager obtains pricing from third-party pricing vendors and the pricing is reviewed daily. At each financial reporting date, the Manager reviews and approves all Level 3 fair value measurements. The Portfolios also have a Valuation Committee, which meets quarterly to perform detailed reviews of the valuations of investments held by the Portfolios, which includes discussion on Level 3 measurements.

Credit risk

Credit risk is the risk that a counterparty to a financial instrument, such as a fixed income security or a derivative contract, will fail to discharge an obligation or commitment that it has entered into with a Portfolio. The value of fixed income securities and derivatives as presented on the Schedule of Investment Portfolio includes consideration of the creditworthiness of the issuer and, accordingly, represents the maximum credit risk exposure of the Portfolios.

Currency risk

Currency risk is the risk that the value of an investment will fluctuate due to changes in foreign exchange rates.

Interest rate risk

Prices of fixed income securities generally increase when interest rates decline and decrease when interest rates rise. This risk is known as interest rate risk. Prices of longer-term fixed income securities will generally fluctuate more in response to interest rate changes than would shorter-term securities. Due to the nature of short-term fixed income securities with a remaining term-to-maturity of less than one year, these investments are not generally exposed to a significant risk that their value will fluctuate in response to changes in the prevailing levels of market interest rates.

Notes to Financial Statements

Liquidity risk

The Portfolios are exposed to daily cash redemptions of redeemable units. Generally, the Portfolios retain sufficient cash and cash equivalent positions to maintain adequate liquidity. However, liquidity risk also involves the ability to sell an asset for cash easily and at a fair price. Some securities are illiquid due to legal restrictions on their resale, the nature of the investment, or simply a lack of interested buyers for a particular security or security type. Certain securities may become less liquid due to changes in market conditions, such as interest rate changes or market volatility, which could impair the ability of a Portfolio to sell such securities quickly or at a fair price. Difficulty in selling securities could result in a loss or lower return for a Portfolio.

Other price/market risk

Other price/market risk is the risk that the value of investments will fluctuate as a result of changes in market conditions. Several factors can influence market trends, such as economic developments, changes in interest rates, political changes, and catastrophic events. All investments are exposed to other price/market risk.

c) Investment Transactions, Income Recognition, and Recognition of Realized and Unrealized Gains and Losses

1. Each transaction of purchase or sale of a portfolio asset by a Portfolio is reflected in the net assets no later than the first computation of net assets made after the date on which the transaction becomes binding upon the Portfolio.
2. Interest for distribution purposes shown on the Statements of Comprehensive Income represents the coupon interest received by the Portfolio accounted for on an accrual basis. The Portfolios do not amortize premiums paid or discounts received on the purchase of fixed income securities, except for zero coupon bonds, which are amortized on a straight-line basis.
3. Dividend income is recorded on the ex-dividend date.
4. Security transactions are recorded on a trade date basis. Securities that are exchange-traded are recorded at fair value established by the last traded market price when that price falls within that day's bid-ask spread. Debt securities are recorded at fair value, established by the last traded price on the Over-the-Counter (OTC) market when that price falls within that day's bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances. Unlisted securities are recorded at fair value using fair valuation techniques established by the Manager in establishing a fair value.
5. Realized gains and losses on investments and unrealized appreciation or depreciation of investments are calculated using the average cost, excluding transaction costs, of the related investments.
6. Investment income is the sum of income paid to the Portfolio that is generated from a Portfolio's investment fund holdings.
7. Other income is the sum of income, excluding transaction costs, other than that which is separately classified on the Statements of Comprehensive Income.

d) Offsetting

Financial assets and liabilities are offset and the net amount reported in the Statements of Financial Position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Where applicable, additional information can be found in the table *Offsetting Arrangements* as part of the Supplemental Schedule to Schedule of Investment Portfolio. This supplemental schedule discloses the OTC derivatives, which are subject to offsetting.

e) Portfolio Securities

The cost of securities of the Portfolios is determined in the following manner. Securities are purchased and sold at a market-traded price to arrive at a value for the position traded. The total purchased value represents the total cost of the security to the Portfolio. When additional units of the same security are purchased, the cost of those additional units is added to the total security cost. When units of the same security are sold, the proportionate cost of the units of the security sold is deducted from the total security cost. If there is a return of capital paid by a security, the amount of this return of capital is deducted from the total security cost. This method of tracking security cost is known as "average cost" and the current total for any one security is referred to as the adjusted cost base or "ACB" of the security. Transaction costs incurred in portfolio transactions are excluded from the average cost of investments and are recognized immediately in Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units and are presented as a separate expense item in the financial statements.

The difference between the fair value of securities and their average cost, excluding transaction costs, represents the unrealized appreciation (depreciation) of investments. The applicable period change in unrealized appreciation (depreciation) of investments is included on the Statements of Comprehensive Income.

f) Multi-Class Structured Portfolios

Each Portfolio may issue an unlimited number of classes of units. The realized and unrealized capital gains or capital losses, income, and common expenses (other than class-specific operating expenses and management fees) of a Portfolio are allocated on each Valuation Date (as defined in note 3) to the unitholders in proportion to the respective prior day's net asset value, which includes the unitholder trade(s) dated for that day, of each class of units at the date on which the allocation is made. Class-specific operating expenses and management fees do not require allocation. All class-specific operating expenses are paid by the Manager and are collected from the Portfolios on a recoverable basis.

g) Loans and Receivables, Other Assets and Liabilities

Loans and receivables, other assets and liabilities (other than those classified as FVTPL) are recorded at cost, which approximates their fair value with the exception of net assets attributable to holders of redeemable units, which are presented at the redemption value.

h) Standards Issued but not yet Effective

Standards issued but not yet effective up to the date of issuance of the Portfolios' financial statements are listed below. The Portfolios intend to adopt applicable standards when they become effective.

IFRS 9, *Financial Instruments - Classification and Measurement*

In July 2014, the IASB issued the final version of IFRS 9, *Financial Instruments*, which reflects all phases of the financial instruments project and replaces IAS 39, *Financial Instruments: Recognition and Measurement* and all previous versions of IFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. IFRS 9 is effective for annual periods beginning on or after January 1, 2018, with early application permitted. The Portfolios plan to adopt the new standard on the effective date. The Manager has reviewed the requirements for transition to IFRS 9 and there are no material impacts anticipated for the Portfolios' Net Assets as the majority of the Portfolios' financial assets are measured at fair value through profit or loss.

i) Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units per Unit

Increase (decrease) in net assets attributable to holders of redeemable units per unit of each class is calculated by dividing the Increase (decrease) in net assets attributable to holders of redeemable units (excluding distributions), as reported in the Statements of Comprehensive Income, by the weighted average number of units in issue during the related period.

3. Valuation of Investments

The valuation date for a Portfolio is any day when the Manager's head office is open for business (*Valuation Date*). The trustee may, at its discretion, establish other Valuation Dates. The value of the investments or assets of a Portfolio is determined as follows:

a) Cash and Other Assets

Cash, accounts receivable, dividends receivable, distributions receivable, and interest receivable are valued at their fair value or at their recorded cost.

b) Mutual Fund Units

Units of each mutual fund in which a Portfolio invests are fair valued at the most recent net asset value quoted by the trustee or manager of the mutual fund on the Valuation Date.

c) Other Securities

All other securities held by the Portfolios will be fair valued in accordance with the laws of the Canadian securities regulatory authorities, where applicable, and using fair valuation techniques that most accurately reflect their current value as determined by the Manager.

The value of any security or other property of a Portfolio for which a market quotation is not readily available or where, in the opinion of the Manager, the market quotations do not properly reflect the current value of such securities, will be determined by the Manager by valuing the securities at their fair value. In such situations, fair value will be determined using fair valuation techniques that most accurately reflect their fair value as established by the Manager.

4. Interest in Underlying Funds

The Portfolios invest in other investment funds (*Underlying Funds*). Each Underlying Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for its unitholders. Each Underlying Fund finances its operations primarily through the issuance of redeemable units, which are puttable at the unitholder's option and entitle the unitholder to a proportionate share of the Underlying Fund's net assets. The Portfolios' interests in Underlying Funds held in the form of redeemable units are reported in its Schedule of Investments at fair value, which represents the Portfolios' maximum exposure on those investments. The Portfolios' interests in Underlying Funds as at the prior year period ends are presented in the Financial Instrument Risks – Concentration Risks section in the Supplemental Schedule to the Schedule of Investment Portfolio. Distributions earned from Underlying Funds are included in "Investment Income" in the Statements of Comprehensive Income. The total realized and change in unrealized gains (losses) arising from Underlying Funds are also included in the Statements of Comprehensive Income. The Portfolios do not provide any additional significant financial or other support to Underlying Funds.

Where applicable, the table *Interests in Underlying Funds* is presented as part of the Supplemental Schedule to Schedule of Investment Portfolio, which provides additional information on the Portfolios' investments in Underlying Funds where the ownership interest exceeds 20% of each Underlying Fund.

5. Redeemable Units Issued and Outstanding

Each Portfolio is permitted to have an unlimited number of classes of units and may issue an unlimited number of units of each class. The outstanding units represent the net assets attributable to holders of redeemable units of the Portfolios. Each unit has no par value and the value of each unit is the net asset value determined on each valuation date. Settlement of the cost for units issued is completed as per laws of the Canadian securities regulatory authorities in place at the time of issue. Distributions made by the Portfolios and reinvested by unitholders in additional units also constitute issued redeemable units of the Portfolios.

Units are redeemed at the net assets attributable to holders of a redeemable unit per unit of each class of units of the Portfolio. A right to redeem units of a Portfolio may be suspended with the approval of the Canadian securities regulatory authorities or when normal trading is suspended on a stock, options, or futures exchange in Canada or outside of Canada on which securities or derivatives that make up more than 50% of the value or underlying market exposure of the total assets of the Portfolio, not including any liabilities of the Portfolio, are traded and when those securities or derivatives are not traded on any other exchange that represents a reasonably practical alternative for the Portfolio. The Portfolios are not subject to any externally imposed capital requirements.

The capital received by a Portfolio is utilized within the respective investment mandate of the Portfolio. This includes, for all Portfolios, the ability to make liquidity available to satisfy unitholder unit redemption requirements upon unitholder request.

Changes in issued and outstanding units for the periods ended August 31, 2018 and August 31, 2017 can be found on the Statements of Changes in Net Assets Attributable to Holders of Redeemable Units.

6. Management Fees and Operating Expenses

Management fees are based on the net asset value of the Portfolios and are calculated daily and paid monthly. Management fees are paid to the Manager in consideration for providing, or arranging for the provision of, management, distribution, and portfolio advisory services. Advertising and promotional expenses, office overhead expenses related to the Manager's activities, trailing commissions and the fees of the portfolio sub-advisors are paid by the Manager out of the management fees received from the Portfolios.

For A, T4, T6, T8 and F classes, the Portfolios may charge up to a maximum annual management fee. The maximum annual management fee expressed as a percentage of the average net asset value for each class of units of the Portfolio is reported in footnote *Maximum Chargeable Management Fee* on the Statements of Comprehensive Income. For Class O units, management fees are negotiated with and paid by, or as directed by, unitholders, or dealers and discretionary managers on behalf of unitholders.

In addition to the management fees, the Portfolios are responsible for all expenses relating to the operation and conduct of the business of the Portfolios, including interest, operating, and administrative costs (other than advertising and promotional expenses, which are the responsibility of the Manager), brokerage fees, commissions, spreads, regulatory fees (including the portion of the regulatory fees paid by the Manager that are attributable to the Portfolios), Independent Review Committee fees and expenses, taxes, audit and legal fees and expenses, trustee fees, safekeeping fees, custodial fees, any agency fees, investor servicing costs, and costs of unitholder reports, prospectuses, fund facts, and other reports. All class-specific operating expenses are paid by the Manager and recovered from the Portfolios. The Portfolios do not pay a fee to the trustee.

The Manager may recover from a Portfolio less than the actual class-specific operating expenses paid by the Manager, resulting in the Manager absorbing class-specific expenses. The Manager may also charge to a Portfolio less than the maximum management fee noted in footnote *Maximum Chargeable Management Fee* on the Statements of Comprehensive Income, resulting in the Manager waiving management fees.

The decision to waive and/or absorb management fees and class-specific operating expenses is at the discretion of the Manager. The practice of waiving and/or absorbing management fees and class-specific operating expenses may continue indefinitely or may be terminated at any time without notice to unitholders. Class-specific operating expenses absorbed and/or management fees waived by the Manager are disclosed on the Statements of Comprehensive Income.

In some cases, the Manager may charge management fees to a Portfolio that are less than the management fees the Manager is entitled to charge in respect of certain investors in a Portfolio. The difference in the amount of the management fees will be paid out by the Portfolio to the applicable investors as a distribution of additional units of the Portfolio (*Management Fee Distributions*). Management Fee Distributions are negotiable between the Manager and the investor and are dependent primarily on the size of the investor's investment in the Portfolio. Management Fee Distributions paid to qualified investors do not adversely impact the Portfolio or any of the Portfolio's other investors. The Manager may increase or decrease the amount of Management Fee Distributions to certain investors from time to time.

Where a Portfolio invests in units of an Underlying Fund, the Portfolio does not pay duplicate management fees on the portion of its assets that it invests in units of the Underlying Fund. In addition, the Portfolio will not pay sales fees or redemption fees with respect to the purchase or redemption by it of units of the Underlying Fund. The manager of the Underlying Funds may, in some cases, waive all or a portion of an Underlying Fund's management fee and/or absorb all or a portion of an Underlying Fund's operating expenses.

7. Income Taxes and Withholding Taxes

All of the Portfolios (except Axiom Foreign Growth Portfolio, which is a unit trust) qualify as mutual fund trusts under the *Income Tax Act* (Canada). No income tax is payable by the Portfolios on net income and/or net realized capital gains that are distributed to unitholders. In addition, for all of the Portfolios (except those that do not qualify as mutual fund trusts under the *Income Tax Act* (Canada)), income taxes payable on undistributed net realized capital gains are refundable on a formula basis when units of the Portfolios are redeemed. Sufficient net income and realized capital gains of the Portfolios have been, or will be, distributed to the unitholders such that no tax is payable by the Portfolios and, accordingly, no provision for income taxes has been made in the financial statements. Occasionally, a Portfolio may pay distributions in excess of net income and realized capital gains of the Portfolio. This excess distribution is called a return of capital and is non-taxable for the unitholders. However, a return of capital will reduce the adjusted cost base of the unitholders' units for tax purposes.

Non-capital losses are available to be carried forward for 20 years.

Capital losses for income tax purposes may be carried forward indefinitely and applied against capital gains realized in future years. Where applicable, a Portfolio's net capital and non-capital losses are reported in footnote *Net Capital and Non-Capital Losses* on the Statements of Changes in Net Assets Attributable to Holders of Redeemable Units.

Axiom Foreign Growth Portfolio has a taxation year-end of December 31. All other Portfolios have a taxation year-end of December 15.

The Portfolios may incur withholding taxes imposed by certain countries on investment income and capital gains. Such income and gains are recorded on a gross basis and the related withholding taxes are shown as a separate expense in the Statements of Comprehensive Income.

8. Related Party Transactions

Canadian Imperial Bank of Commerce (*CIBC*) and its affiliates have the following roles and responsibilities with respect to the Portfolios and receive the fees described below in connection with their roles and responsibilities. Management fees payable and other accrued expenses on the Statements of Financial Position are amounts generally payable to a related party of the Portfolio.

Manager, Trustee, and Portfolio Advisor of the Portfolios

CAMI (CIBC Asset Management Inc.), a wholly owned subsidiary of CIBC, is the Manager, trustee, and portfolio advisor of each of the Portfolios. The Manager also arranges for fund administrative services (other than advertising and promotional services, which are the responsibility of the Manager), legal, investor servicing, costs of unitholder reports, prospectuses, and other reports. The Manager is the registrar and transfer agent for the Portfolios and provides, or arranges for the provision of, all other administrative services required by the Portfolios. The dollar amount (including all applicable taxes) of all fund administrative expenses (net of absorptions) that the Manager recovers from the Portfolio is reported in footnote *Administrative and Other Fund Operating Expenses* on the Statements of Comprehensive Income.

Notes to Financial Statements

Custodian

The Custodian holds cash and securities for the Portfolios and ensures that those assets are kept separate from any other cash or securities that the custodian might be holding. The custodian also provides other services to the Portfolios, which could include record keeping and processing of foreign exchange transactions. CIBC Mellon Trust Company is the custodian of the Portfolios (the *Custodian*). The fees and spreads for the services of the Custodian are paid by the Manager and charged to each Portfolio on a recoverable basis. CIBC owns a 50 percent interest in the Custodian.

Service Provider

CIBC Mellon Global Securities Services Company (*CIBC GSS*) provides certain services to the Portfolios, including fund accounting and reporting, and portfolio valuation. CIBC indirectly owns a 50 percent interest in CIBC GSS. The dollar amount paid by the Portfolios (including all applicable taxes) to CIBC Mellon Trust Company for custodial fees (net of absorptions) and to CIBC GSS for fund accounting, reporting, and fund valuation (all net of absorptions) for the periods ended August 31, 2018 and August 31, 2017 is reported in footnote *Service Provider* on the Statements of Operations.

INDEPENDENT AUDITORS' REPORT

To the Unitholders of

Axiom Balanced Income Portfolio
Axiom Diversified Monthly Income Portfolio
Axiom Balanced Growth Portfolio
Axiom Long-Term Growth Portfolio
Axiom Canadian Growth Portfolio
Axiom Global Growth Portfolio
Axiom Foreign Growth Portfolio
Axiom All Equity Portfolio
(Collectively, the "Portfolios")

We have audited the accompanying financial statements of each of the Portfolios, which comprise the statements of financial position as at August 31, 2018 and 2017, and the statements of comprehensive income, changes in net assets attributable to holders of redeemable units and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Portfolios as at August 31, 2018 and 2017, and their financial performance and their cash flows for the years then ended in accordance with International Financial Reporting Standards.
