### Management Discussion of Fund Performance

#### Investment Objective and Strategies

Investment Objective: Axiom Canadian Growth Portfolio (the *Portfolio*) seeks to achieve long-term capital growth by investing in a portfolio of Canadian equity mutual funds for higher growth potential, with some exposure to Canadian fixed income securities for diversification (its *Underlying Pools*).

Investment Strategies: The portfolio advisor has established a long-term strategic asset mix weighting for the Portfolio with, under normal market conditions, an asset mix of fixed income (5-35%) and equities (65-95%). While the portfolio advisor will not generally actively manage the asset mix of the Portfolio, the portfolio advisor will monitor and, if deemed necessary, periodically rebalance the Portfolio to realign the weightings to the strategic asset mix or to add or remove Underlying Pools to achieve the Portfolio's investment objective.

#### Risk

The Portfolio is a Canadian equity balanced fund that is suitable for investors who are willing to accept medium investment risk and who are seeking the potential for long-term capital growth in the Canadian markets.

The Portfolio is broadly diversified at multiple levels to minimize overall risk. Holdings of the Underlying Pools are diversified within the Portfolio's asset classes and by investment manager, style, geographic region, and market capitalization. Through the discipline of strategic asset allocation, the Portfolio is designed to decrease reliance on any one individual stock, sector, region, or management style.

During the period ended August 31, 2011, the Portfolio's risk classification was changed from 'average' to 'medium' to reflect The Investment Funds Institute of Canada's revised risk categories. Although the risk classification changed, the overall level of risk remains as discussed in the Portfolio's simplified prospectus.

#### Results of Operations

The Portfolio invests in units of various Frontiers Pools. The following provides a summary of the results of operations for the period ended

August 31, 2011. All dollar figures are expressed in thousands, unless otherwise indicated.

- The Portfolio's net asset value decreased by 1% during the period, from \$64,480 as at August 31, 2010 to \$63,805 as at August 31, 2011. Net redemptions of \$3,766 were partially offset by positive investment performance, resulting in an overall decrease in net asset value.
- Class A units of the Portfolio posted a return of 4.9% for the period. The Portfolio's primary benchmark the S&P/TSX Composite Index (the *primary benchmark*), returned 9.9% for the same period. The Portfolio return is after the deduction of fees and expenses, unlike the primary benchmark. See *Past Performance* for the returns of other classes of units offered by the Portfolio.
- The Portfolio's performance may differ from that of its primary benchmark as it is diversified with exposure to other asset classes. In addition to Canadian equity, the Portfolio also provides exposure to Canadian fixed income. Both asset classes contributed to positive performance for the period. The period saw a measure of financial market volatility and, largely influenced by macroeconomic and geopolitical concerns, some investors moved between equities and the perceived safe haven gold and the bond market. Despite this volatile environment, on a net basis, the Portfolio's exposure to Canadian fixed income and Canadian equity contributed positively to performance.

#### Recent Developments

Effective on or about October 3, 2011, the Portfolio intends to use derivatives to help achieve its investment objective and manage risk.

During the period, CIBC Global Asset Management Inc. (CGAM) was appointed portfolio sub-advisor of the Portfolio.

The Portfolio's blended benchmark changed during the period because a component of it, the Scotia Capital Income Trust Index, was discontinued. The blended benchmark now consists of a 75% weighting in the S&P/TSX Composite Index and a 25% weighting in the DEX Universe Bond Index.

*International Financial Reporting Standards (IFRS)*

In January 2011, the Accounting Standards Board (AcSB) amended the Introduction to Part I of the Canadian Institute of Chartered Accountants' (CICA) Handbook – Accounting to allow investment companies, which include investment funds, to adopt IFRS for the first time no later than interim and annual financial statements relating to annual periods beginning on or after January 1, 2013. Investment companies electing to defer the first time adoption may continue to apply existing Canadian generally accepted accounting principles (GAAP) until the changeover to IFRS.

The Portfolio will defer the first time adoption and adopt IFRS beginning September 1, 2013. As at August 31, 2011, the Manager has developed a changeover plan to meet this timetable.

**Related Party Transactions**

Canadian Imperial Bank of Commerce (CIBC) and its affiliates have the following roles and responsibilities with respect to the Portfolio, and receive the fees described below in connection with their roles and responsibilities.

*Manager, Trustee, and Portfolio Advisor of the Portfolio*

CIBC Asset Management Inc., a wholly-owned subsidiary of CIBC, is the manager, trustee, and portfolio advisor of the Portfolio (CAMI or the Manager). CAMI will receive management fees with respect to the day-to-day business and operations of the Portfolio, calculated based on the net asset value of each respective class of units of the Portfolio, as described in the section entitled *Management Fees*. As portfolio advisor, CAMI provides, or arranges to provide, investment advice and portfolio management services to the Portfolio. CAMI will also compensate its wholesalers in connection with their marketing activities regarding the Portfolio. From time to time, CAMI may provide seed capital to the Portfolio.

*Distributor*

Dealers sell units of the Portfolio to investors. These dealers will include CIBC's related dealers such as the CIBC Investor's Edge discount brokerage division of CIBC Investor Services Inc. (CIBC ISI), the CIBC Imperial Service division of CIBC ISI, and the CIBC Wood Gundy division of CIBC World Markets Inc. (CIBC WM). CIBC WM and CIBC ISI are wholly-owned subsidiaries of CIBC. CAMI may pay sales commissions and trailing commissions to these dealers in connection with the sale of units of the Portfolio. These dealers may pay a portion of these sales commissions and trailing commissions to their advisors who sell units of the Portfolio to investors.

*Portfolio Sub-Advisor*

CAMI has retained CGAM, a wholly-owned subsidiary of CIBC, as the portfolio sub-advisor of the Portfolio, to provide investment advice and portfolio management services to the Portfolio. A portion of the management fees CAMI receives from the Portfolio will be paid to CGAM.

*Custodian*

The custodian holds all cash and securities for the Portfolio and ensures that those assets are kept separate from any other cash or securities that the custodian may be holding. CIBC Mellon Trust Company is the custodian of the Portfolio (the *Custodian*). The fees for the services of the Custodian are paid by the Manager and charged to the Portfolio on a recoverable basis.

*Service Provider*

CIBC Mellon Global Securities Services Company (CIBC GSS) provides certain services to the Portfolio, including fund accounting and reporting and portfolio valuation. Such servicing fees are paid by the Manager, and charged to the Portfolio on a recoverable basis. CIBC indirectly owns a 50% interest in CIBC GSS.

<sup>4</sup> This information is provided as at August 31 of the period(s) shown.

<sup>5</sup> Management expense ratio is based on the total expenses of the fund (excluding commissions and other portfolio transaction costs), incurred by or allocated to a class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.

<sup>6</sup> The decision to waive and/or absorb management fees and operating expenses is at the discretion of the Manager. The practice of waiving and/or absorbing management fees and operating expenses may continue indefinitely or may be terminated at any time without notice to unitholders.

<sup>7</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the daily average net asset value during the period.

<sup>8</sup> The portfolio turnover rate indicates how actively the portfolio advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by a fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

<sup>a</sup> Information presented is for the period from December 4, 2009 to August 31, 2010.

\*Ratio has been annualized.

<sup>4</sup> This information is provided as at August 31 of the period(s) shown.

<sup>5</sup> Management expense ratio is based on the total expenses of the fund (excluding commissions and other portfolio transaction costs), incurred by or allocated to a class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.

<sup>6</sup> The decision to waive and/or absorb management fees and operating expenses is at the discretion of the Manager. The practice of waiving and/or absorbing management fees and operating expenses may continue indefinitely or may be terminated at any time without notice to unitholders.

<sup>7</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the daily average net asset value during the period.

<sup>8</sup> The portfolio turnover rate indicates how actively the portfolio advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by a fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Management Fees

The Portfolio, either directly or indirectly, pays one or more annual management fees to CAMI in consideration for the provision of, or arranging for the provision of, management, distribution, and portfolio advisory services. These fees are calculated as a percentage of the Portfolio's class level net asset value and are calculated and credited daily, and paid monthly. The Portfolio is required to pay all applicable taxes on the management fees.

Where a Portfolio invests in securities of other mutual funds, no management fees or incentive fees are payable by the Portfolio that, to a reasonable person, would duplicate a fee payable by the Underlying Pool for the same service.

The following table shows a breakdown of the services received in consideration of the management fees, as a percentage of the management fees collected from the Portfolio for the period ended August 31, 2011. These amounts do not include waived fees or absorbed expenses.

	Class A Units	Class T4 Units	Class T6 Units	Class T8 Units	Select Class Units
Sales and trailing commissions paid to dealers	53.24%	46.77%	22.51%	100.00%	42.58%
General administration, investment advice, and profit	46.76%	53.23%	77.49%	0.00%	57.42%

	Select-T8 Class Units	Elite Class Units	Class F Units
Sales and trailing commissions paid to dealers	36.12%	43.33%	0.00%
General administration, investment advice, and profit	63.88%	56.67%	100.00%

## Past Performance

The performance data provided assumes reinvestment of distributions only and does not take into account sales, redemption, distribution, or other optional charges payable by any unitholder that would have reduced returns. Past performance does not necessarily indicate how a fund will perform in the future.

Past performance for Select-T4, Select-T6, Elite-T4, Elite-T6, Elite-T8, and Class O units has not been shown because, as at August 31, 2011, there were no units of these classes in existence.

The Portfolio's returns are after the deduction of fees and expenses, and the difference in returns between classes is primarily due to the difference in management expense ratio. See the section entitled *Financial Highlights* for the management expense ratio.

## Year-by-Year Returns

The bar charts show the annual performance of each class of units of the Portfolio for each of the periods shown, and illustrates how the performance has changed from period to period. The bar charts show, in percentage terms, how much an investment made on September 1 would have increased or decreased by August 31, unless otherwise indicated.

### Class A Units

<sup>a</sup>2005 return is for the period from March 15, 2005 to September 30, 2005.

<sup>b</sup>2006 return is for the period from October 1, 2005 to August 31, 2006.

Class T4 Units

<sup>a</sup>2010 return is for the period from March 8, 2010 to August 31, 2010.

**Annual Compound Returns**

This table shows the annual compound return of each class of units of the Portfolio for each indicated period ended on August 31, 2011. The annual compound total return is also compared to the Portfolio's benchmark(s).

The Portfolio's blended benchmark changed during the period because a component of it, the Scotia Capital Income Trust Index, was discontinued. As a result, the annual compound returns for the previous blended benchmark cannot be shown.

The Portfolio's blended benchmark (*Blended Benchmark*) is comprised of the following:

- 75% S&P/TSX Composite Index
- 25% DEX Universe Bond Index
