

Annual Management Report of Fund Performance

for the financial year ended August 31, 2009

All figures are reported in Canadian dollars unless otherwise noted.

This annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. If you have not received a copy of the annual financial statements with this annual management report of fund performance, you can get a copy of the annual financial statements at your request, and at no cost, by calling us toll-free at 1-888-888-FUND (3863), by writing to us at Renaissance Investments, 1500 University Street, Suite 800, Montreal, Quebec, H3A 3S6, by visiting the SEDAR website at www.sedar.com, or by visiting www.renaissanceinvestments.ca.

Unitholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Investment Objective and Strategies

Investment Objective: Renaissance Canadian Balanced Fund (the *Fund*) seeks to achieve a high level of investment return from both income and capital growth by investing primarily in a diversified portfolio of Canadian equity securities, investment-grade bonds, and money market instruments.

Investment Strategies: The Fund invests in a combination of equity and fixed income securities issued by governments or corporations. The Fund uses primarily a bottom-up approach to investing in equity securities of high-quality companies, in combination with a strategic asset allocation strategy.

Risk

The Fund is a Canadian balanced fund suitable for medium- to long-term investors who can tolerate low to moderate investment risk.

Global capital markets experienced high levels of volatility over the period as a result of the economic recession that started the period and the subsequent recovery phase which took place over the latter half of the period. The first three months of the period were marked, in particular, by the sudden collapse of several large U.S. financial institutions that resulted in mergers, bankruptcy, or the sale of a substantial number of shares to the U.S. government and other investors. These events led to an erosion of investor confidence and a temporary seizing of credit and money markets. As confidence in global financial markets diminished, governments around the world responded with frequent cash infusions to add temporary liquidity and work to unlock credit markets. These events had a direct impact on global equity and fixed income markets and, as a result, the potential general market risk to the Fund was increased at the onset of the period. In the latter half of the period, global capital markets experienced the beginning phases of a recovery and equity markets delivered much improved returns as investor confidence began to shift back to riskier asset

classes. The markets continued to experience ripples as investors remained cautious but significant advances were made over the third and fourth quarters to return a sizeable portion of the losses incurred at the start of the period.

Despite the above-mentioned risk factors, the overall risk level of the Fund was not significantly impacted. The risk level of the Fund continues to be as described in the Fund's simplified prospectus.

Results of Operations

The portfolio sub-advisor of the Fund is Jarislowsky Fraser Limited (the *sub-advisor*). The commentary that follows reflects the views of the sub-advisor and provides a summary of the results of operations for the period ended August 31, 2009. All dollar figures are expressed in thousands, unless otherwise indicated.

- The Fund's net asset value decreased by 26% during the period, from \$415,641 as at August 31, 2008 to \$309,169 as at August 31, 2009. Net redemptions of \$69,309 contributed to the decrease in net asset value, which was further reduced by negative investment performance. Global economic markets experienced unusual volatility over the period which contributed to the increased unitholder activity.
- While overall market returns are still negative over the period, since March 2009 equity markets have seen a considerable rebound. The more conservative investment philosophy of the equity portfolio helped to protect capital in the down period. Nonetheless, the Fund did experience a negative return over the period.
- Although positive signs for the economy have emerged, investors question how the recovery is shaping up. Most of the recovery stems from government stimulus packages, which supplemented lower consumer demand and spending. The sub-advisor's approach remains focused on businesses that are not reliant on a strong economic recovery.

- The Fund's asset mix detracted from performance as the Fund was overweight equities relative to bonds during a period when equities underperformed bonds.
- The portfolio's underweight exposure to resource related stocks, and good stock selection within the energy sector were the largest contributors to relative performance for the Canadian equity portion of the portfolio.
- Good stock selection and substantial exposure to the consumer staples sector contributed the most to performance for the U.S. equity portion of the portfolio.
- The sub-advisor's focus on companies with more stable businesses and earning streams meant that the portfolio's holdings within the industrials and information technology sectors did not see as much of a decline compared to the broader market.
- The Fund will tend to have an overweight exposure to corporate bonds, with a focus on high-quality issues. These corporate bonds presented great value especially when liquidity fears were rampant. As credit markets improved, so did the performance of corporate bonds leading to strong relative performance for the portfolio.
- The Fund remains overweight in equities, with a focus on businesses that are not dependant on the path of the economy.

Recent Developments

Accounting Policy Change

The Canadian Institute of Chartered Accountants (CICA) issued CICA Handbook Section 3862, *Financial Instruments – Disclosures (Section 3862)*, and CICA Handbook Section 3863, *Financial Instruments – Presentation (Section 3863)*, effective for fiscal years beginning on or after October 1, 2007. These policies provide comprehensive disclosure and presentation requirements for financial instruments. Section 3862 replaces the disclosure portion of CICA Handbook Section 3861, *Financial Instruments – Disclosure and Presentation (Section 3861)*, and introduces new requirements for specific qualitative and quantitative disclosure about risks. Section 3863, carries forward the presentation requirements from Section 3861, unchanged. This includes the requirements to quantify exposures for certain risks and provide sensitivity analysis on some risks. The objective of these policies is to enable investors to evaluate the significance of financial instruments, the nature and extent of risks involved, and how the risks are managed. On September 1, 2008, the Fund adopted these standards retroactively, without restatement of prior period financial statements, in accordance with their transitional provisions. The adoption of these standards did not have an impact on net assets, increase (decrease) in net assets from operations, or increase (decrease) in net assets from operations per unit of the Fund.

Effective January 1, 2009, the Fund adopted, retrospectively without restatement, the CICA Emerging Issues Committee Abstract EIC-173, Credit Risk and the Fair Value of Financial Assets and Liabilities (*EIC-173*). EIC-173 requires the Fund's own

credit risk and the credit risk of the counterparties to be taken into account in determining the fair value of financial assets and liabilities, including derivative instruments. The adoption of EIC-173 did not have a material impact on the financial position or results of operations of the Fund.

Related Party Transactions

Canadian Imperial Bank of Commerce (*CIBC*) and its affiliates have the following roles and responsibilities with respect to the Fund, and receive the fees described below in connection with their roles and responsibilities.

Manager, Trustee, and Portfolio Advisor of the Fund

CIBC Asset Management Inc., a wholly-owned subsidiary of CIBC, is the manager, trustee, and portfolio advisor of the Fund (*CAMI* or the *Manager*). CAMI will receive management fees with respect to the day-to-day business and operations of the Fund, calculated based on the net asset value of each respective class of units of the Fund, as described in the section entitled *Management Fees*. As portfolio advisor, CAMI provides, or arranges to provide, investment advice and portfolio management services to the Fund. CAMI will also compensate its wholesalers in connection with their marketing activities regarding the Fund. From time to time, CAMI may provide seed capital to the Fund.

Distributor

Dealers and other firms will sell the units of the Fund to investors. These dealers and other firms will include CIBC's related dealers such as the CIBC Investor's Edge discount brokerage division of CIBC Investor Services Inc. (*CIBC ISI*), the CIBC Imperial Service division of CIBC ISI, and the CIBC Wood Gundy division of CIBC World Markets Inc. (*CIBC WM*). CIBC ISI and CIBC WM are wholly-owned subsidiaries of CIBC.

CAMI may pay sales commissions and trailing commissions to these dealers and firms in connection with the sale of units of the Fund. These dealers and other firms may pay a portion of these sales commissions and trailing commissions to their advisors who sell units of the Fund to investors.

Brokerage Arrangements and Soft Dollars

Portfolio sub-advisors make decisions, including the selection of markets and dealers and the negotiation of commissions, with respect to the purchase and sale of portfolio securities and the execution of portfolio transactions. Brokerage business may be allocated by portfolio sub-advisors to CIBC WM and CIBC World Markets Corp., each a subsidiary of CIBC. CIBC WM and CIBC World Markets Corp. may also earn spreads on the sale of fixed income and other securities to the Fund. A spread is the difference between the bid and ask prices for a security in the applicable marketplace, with respect to the execution of portfolio transactions. The spread will differ based upon various factors such as the nature and liquidity of the security.

Dealers, including CIBC WM and CIBC World Markets Corp., may also furnish research, statistical, and other services to portfolio sub-advisors that process trades through them (referred to in the industry as “soft-dollar” arrangements). These services assist portfolio sub-advisors with investment decision making services to the Fund. As per the terms of the sub-advisory agreements, such soft dollar arrangements are in compliance with applicable laws. In addition, CAMI may enter into commission recapture arrangements with certain dealers with respect to the Fund. Any commission recaptured will be paid to the Fund.

During the period, the Fund paid brokerage commissions and other fees of \$3,242 to CIBC WM and \$87 to CIBC World Markets Corp. Spreads associated with fixed income and other securities are not ascertainable and, for that reason, cannot be included when determining these amounts.

Fund Transactions

The Fund may purchase and sell securities of CIBC. The Fund may also, from time to time, purchase securities underwritten by a related dealer, such as CIBC WM or CIBC World Markets Corp.,

each an affiliate of the Manager. Such transactions are currently made pursuant to standing instructions rendered by the Independent Review Committee.

Custodian

The custodian holds all cash and securities for the Fund and ensures that those assets are kept separate from any other cash or securities that the custodian may be holding. CIBC is the custodian of the Fund (the *Custodian*). The Custodian may hire sub-custodians for the Fund. The fees for the services of the Custodian are paid by the Manager and charged to the Fund on a recoverable basis.

Service Provider

CIBC Mellon Global Securities Services Company (*CIBC GSS*) provides certain services to the Fund, including fund accounting and reporting, securities lending, and portfolio valuation. Such servicing fees are paid by the Manager and charged to the Fund on a recoverable basis. CIBC indirectly owns a fifty percent interest in CIBC GSS.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the periods ended August 31, 2009, 2008, 2007, and 2006 and December 31, 2005.

The Fund's Net Assets per Unit¹ – Class A Units

	2009	2008	2007	2006 ^a	2005
Net Assets, beginning of period	\$21.65	\$22.53	\$21.90	\$21.41	\$19.77
Increase (decrease) from operations:					
Total revenue	\$ 0.69	\$ 0.84	\$ 0.78	\$ 0.48	\$ 0.70
Total expenses	(0.39)	(0.47)	(0.49)	(0.31)	(0.43)
Realized gains (losses) for the period	(0.93)	1.20	1.53	0.83	0.30
Unrealized gains (losses) for the period	(1.10)	(2.17)	(0.49)	(0.39)	1.35
Total increase (decrease) from operations²	\$ (1.73)	\$ (0.60)	\$ 1.33	\$ 0.61	\$ 1.92
Distributions:					
From income (excluding dividends)	\$ 0.22	\$ 0.06	\$ 0.13	\$ –	\$ 0.10
From dividends	0.11	0.25	0.24	0.14	0.15
From capital gains	0.79	–	0.18	–	–
Return of capital	–	–	–	–	–
Total Distributions³	\$ 1.12	\$ 0.31	\$ 0.55	\$ 0.14	\$ 0.25
Net Assets, end of period	\$18.91	\$21.65	\$22.56	\$21.90	\$21.41

^aInformation presented is for the period from January 1, 2006 to August 31, 2006.

¹This information is derived from the Fund's audited annual financial statements. The net assets per unit presented in the financial statements may differ from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.

²Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding during the period.

³Distributions were paid in cash, reinvested in additional units of the Fund, or both.

Ratios and Supplemental Data – Class A Units

	2009	2008	2007	2006 ^a	2005
Total Net Asset Value (000s)⁴	\$307,584	\$374,803	\$459,526	\$479,067	\$511,316
Number of Units Outstanding⁴	16,236,667	17,275,614	20,371,216	21,878,821	23,881,748
Management Expense Ratio⁵	2.18%	2.13%	2.13%	2.15%*	2.08%
Management Expense Ratio before waivers or absorptions⁶	2.28%	2.14%	2.13%	2.24%*	2.15%
Trading Expense Ratio⁷	0.02%	0.02%	0.02%	0.01%*	0.01%
Portfolio Turnover Rate⁸	20.25%	20.31%	20.69%	11.13%	13.00%
Net Asset Value per Unit	\$18.94	\$21.70	\$22.56	\$21.90	\$21.41

^aInformation presented is for the period from January 1, 2006 to August 31, 2006.

*Ratio has been annualized.

⁴This information is presented as at August 31, 2009, 2008, 2007, and 2006 and December 31, 2005.

⁵Management expense ratio is based on the total expenses of the Fund (excluding commissions and other portfolio transaction costs), incurred by or allocated to that class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.

⁶The decision to waive and/or absorb management fees and operating expenses is at the discretion of the Manager. The practice of waiving and/or absorbing management fees and operating expenses may continue indefinitely or may be terminated at any time without notice to unitholders.

⁷The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the daily average net asset value during the period. Spreads associated with fixed income securities trading are not ascertainable and, for that reason, are not included in the trading expense ratio calculation.

⁸The portfolio turnover rate indicates how actively the portfolio sub-advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by a fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

^aInformation presented is for the period from January 1, 2006 to August 31, 2006.

^bInformation presented is for the period from November 23, 2005 to December 31, 2005.

*Ratio has been annualized.

⁴This information is presented as at August 31, 2009, 2008, 2007, and 2006 and December 31, 2005.

⁵Management expense ratio is based on the total expenses of the Fund (excluding commissions and other portfolio transaction costs), incurred by or allocated to that class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.

⁶The decision to waive and/or absorb management fees and operating expenses is at the discretion of the Manager. The practice of waiving and/or absorbing management fees and operating expenses may continue indefinitely or may be terminated at any time without notice to unitholders.

⁷The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the daily average net asset value during the period. Spreads associated with fixed income securities trading are not ascertainable and, for that reason, are not included in the trading expense ratio calculation.

⁸The portfolio turnover rate indicates how actively the portfolio sub-advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by a fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

The Fund, either directly or indirectly, pays one or more annual management fees to CAMI in consideration for the provision of, or arranging for the provision of, management, distribution, and portfolio advisory services. These fees are calculated as a percentage of the Fund's class level net asset value and are calculated and credited daily, and paid monthly. The Fund is required to pay Goods and Services Tax (GST) on the management fees.

The following table shows a breakdown of the services received in consideration of the management fees, as a percentage of the management fees collected from the Fund for the period ended August 31, 2009. These amounts do not include waived fees or absorbed expenses.

	Class A Units	Class F Units
Sales and trailing commissions paid to dealers	46.82%	0.00%
General administration, investment advice, and profit	53.18%	100.00%

Past Performance

The performance data provided assumes reinvestment of distributions only and does not take into account sales, redemption, distribution, or other optional charges payable by any unitholder that would have reduced returns. Past performance does not necessarily indicate how a fund will perform in the future.

Past performance for Class O units has not been shown because as at August 31, 2009, there were no Class O units outstanding.

The Fund's primary benchmarks are the S&P/TSX Composite Index and the DEX Universe Bond Index. The S&P/TSX Composite Index is intended to represent the Canadian equity market and includes the largest companies listed on the TSX. The DEX Universe Bond Index is comprised of more than 900 marketable Canadian bonds intended to reflect the performance of the broad Canadian bond market.

The Fund's secondary benchmark is a blended index consisting of a 40% weighting in the DEX Universe Bond Index, a 30% weighting in the S&P/TSX Composite Index, a 20% weighting in the MSCI World Index, and a 10% weighting in the DEX 91 day TBill Index (*blended benchmark*). The MSCI World Index is a market capitalization-weighted index composed of companies representative of the market structure of 23 developed market countries in North America, Europe, and the Asia/Pacific region. The DEX 91 day TBill Index measures the returns attributable to 91-day Treasury Bills.

For the period, Class A and Class F units of the Fund returned -7.0% and -5.8%, respectively. Class A and Class F units outperformed the S&P/TSX Composite Index return of -18.2% and underperformed both the DEX Universe Bond Index return of 7.2% and the blended benchmark return of -4.9% for the same period.

The Fund's returns are after the deduction of fees and expenses. See the section entitled *Financial Highlights* for the management expense ratio.

Year-by-Year Returns

These bar charts show the annual performance of each class of units of the Fund for each of the periods shown, and illustrates how the performance has changed from period to period. These bar charts show, in percentage terms, how an investment made on September 1 would have increased or decreased by August 31, unless otherwise indicated.

Class A Units

^aReturn is for the period from January 1 to December 31 of the year shown.

^b2006 return is for the period from January 1, 2006 to August 31, 2006.

Class F Units

^a2005 return is for the period from November 23, 2005 to December 31, 2005.

^b2006 return is for the period from January 1, 2006 to August 31, 2006.

Annual Compound Returns

These tables show the annual compound total return of each class of units of the Fund for each indicated period ended on August 31, 2009. The annual compound total return is also compared to the Fund's applicable benchmark(s).

Class A Units

	Class A Units	S&P/TSX Composite Index	DEX Universe Bond Index	Blended Benchmark
Past Year	-7.0%	-18.2%	7.2%	-4.9%
3 Year	-1.5%	-0.6%	5.5%	1.7%
5 Year	2.3%	8.0%	5.8%	5.3%
10 Year	3.8%	6.7%	6.6%	4.9%

Class F Units

	Class F Units	S&P/TSX Composite Index	DEX Universe Bond Index	Blended Benchmark
Past Year	-5.8%	-18.2%	7.2%	-4.9%
3 Year	0.2%	-0.6%	5.5%	1.7%
Since Inception (for the period from November 23, 2005 to August 31, 2009)	1.3%	3.2%	5.3%	3.4%

Summary of Investment Portfolio (as at August 31, 2009)

The summary of investment portfolio may change due to ongoing portfolio transactions of the investment fund. A quarterly update is available by visiting www.renaissanceinvestments.ca. The Top Positions table includes a fund's 25 largest positions. For funds with fewer than 25 positions in total, all positions are shown. Cash and cash equivalents are shown in total as one position.
