Management Discussion of Fund Performance

Investment Objective and Strategies

Investment Objective: Renaissance Canadian Growth Fund (the *Fund*) seeks to achieve long-term investment returns through capital growth, primarily in equity securities of large- to medium-sized Canadian issuers.

Investment Strategies: The Fund invests primarily in issuers listed on the TSX and may also invest in securities of issuers located in other countries. Issuers will typically have an established record of earnings, financial strength, good management, and above-average relative growth potential and will typically have a market capitalization of more than \$1 billion.

Risk

The Fund is a Canadian focused equity fund suitable for investors who can tolerate medium investment risk and are seeking the capital appreciation potential of Canadian companies.

During the period ended August 31, 2011, the Fund's risk classification was changed from 'average' to 'medium' to reflect The Investment Funds Institute of Canada's revised risk categories. Although the risk classification changed, the overall level of risk remains as discussed in the Fund's simplified prospectus.

Results of Operations

The portfolio sub-advisor of the Fund is McLean Budden Limited (the *sub-advisor*). The commentary that follows reflects the views of the sub-advisor and provides a summary of the results of operations for the period ended August 31, 2011. All dollar figures are expressed in thousands, unless otherwise indicated.

- The Fund's net asset value decreased by 15% during the period, from \$162,313 as at August 31, 2010 to \$138,173 as at August 31, 2011. Net redemptions of \$28,072 were partially offset by positive investment performance, resulting in an overall decrease in net asset value.
- Class A units of the Fund posted a return of 0.7% for the period. The Fund's primary benchmark, the S&P/TSX Composite Index (the *benchmark*), returned 9.9% for the same period. The Fund return is after the deduction of fees and expenses, unlike the benchmark.

See *Past Performance* for the returns of other classes of units offered by the Fund.

- Underperformance relative to the benchmark was due to weakness in both stock selection and the resulting sector allocation.
- Within stock selection, strong performance from diversified miner Teck Resources Ltd. and Cenovus Energy Inc. was offset by weakness in the information technology sector, namely Research In Motion Ltd., which revised earnings projections lower for the current year. Weakness in the consumer discretionary sector was mainly due to performance of auto parts supplier Magna International Inc. While Sino-Forest Corp. was a recent addition to the portfolio, the adverse impact on its share price that resulted from the very damaging allegations of fraud made by Carson Block, the head of hedge fund manager Muddy Waters, led the team to sell the position. Even if proven to be false, the allegations have impeded the company's ability to finance its growth.
- At the end of the period, the portfolio continued to favour stocks in the consumer discretionary, information technology, and industrial sectors with materials and financials representing the largest underweight positions.
- The portfolio's focus remains on companies that are positioned for growth while enjoying a competitive advantage within their respective industries.
- The Fund's higher portfolio turnover rate can be attributed to slightly increased trading activity around portfolio positioning, as well as the continuing net redemptions. During the period, the Fund experienced virtually no inflows, with redemptions accelerating as compared to 2010.

Recent Developments

International Financial Reporting Standards (IFRS)

In January 2011, the Accounting Standards Board (AcSB) amended the Introduction to Part I of the CICA Handbook – Accounting to allow investment companies, which include investment funds, to adopt IFRS for the first time no later than interim and annual financial statements relating to annual periods beginning on or after January 1, 2013.

Investment companies electing to defer the first time adoption may continue to apply existing Canadian generally accepted accounting principles (GAAP) until the changeover to IFRS.

The Fund will defer the first time adoption and adopt IFRS beginning September 1, 2013. As at August 31, 2011, the Manager has developed a changeover plan to meet this timetable.

Related Party Transactions

Canadian Imperial Bank of Commerce (CIBC) and its affiliates have the following roles and responsibilities with respect to the Fund, and receive the fees described below in connection with their roles and responsibilities.

Manager, Trustee, and Portfolio Advisor of the Fund

CIBC Asset Management Inc., a wholly-owned subsidiary of CIBC, is the manager, trustee, and portfolio advisor of the Fund (CAMI or the Manager). CAMI will receive management fees with respect to the day-to-day business and operations of the Fund, calculated based on the net asset value of each respective class of units of the Fund, as described in the section entitled *Management Fees*. As portfolio advisor, CAMI provides, or arranges to provide, investment advice and portfolio management services to the Fund. CAMI will also compensate its wholesalers in connection with their marketing activities regarding the Fund. From time to time, CAMI may provide seed capital to the Fund.

Distributor

Dealers and other firms will sell the units of the Fund to investors. These dealers and other firms will include CIBC's related dealers such as the CIBC Investor's Edge discount brokerage division of CIBC Investor Services Inc. (CIBC ISI), the CIBC Imperial Service division of CIBC ISI, and the CIBC Wood Gundy division of CIBC World Markets Inc. (CIBC WM). CIBC ISI and CIBC WM are wholly-owned subsidiaries of CIBC.

CAMI may pay sales commissions and trailing commissions to these dealers and firms in connection with the sale of units of the Fund. These dealers and other firms may pay a portion of these sales commissions and trailing commissions to their advisors who sell units of the Fund to investors.

Brokerage Arrangements and Soft Dollars

Portfolio sub-advisors make decisions, including the selection of markets and dealers and the negotiation of commissions, with respect to the purchase and sale of portfolio securities, certain derivative products (including futures) and the execution of portfolio transactions. Brokerage business may be allocated by portfolio sub-advisors to CIBC WM and CIBC World Markets Corp., each a subsidiary of CIBC. CIBC WM and CIBC World Markets Corp. may also earn spreads on the sale of fixed income, other securities and certain derivative products (including forwards) to the Fund. A spread is the difference between the bid and ask prices for a security in the applicable marketplace, with respect to the execution of portfolio transactions. The spread will differ based upon various factors such as the nature and liquidity of the security.

Dealers, including CIBC WM and CIBC World Markets Corp., may also furnish goods and services, other than order execution, to portfolio sub-advisors that process trades through them (referred to in the industry as "soft-dollar" arrangements). These goods and services are paid for with a portion of brokerage commissions and assist portfolio sub-advisors with investment decision making services to the Fund or relate directly to executing portfolio transactions on behalf of the Fund. As per the terms of the portfolio sub-advisory agreements, such soft dollar arrangements are in compliance with applicable laws. In addition, CAMI may enter into commission recapture arrangements with certain dealers with respect to the Fund. Any commission recaptured will be paid to the Fund.

During the period, the Fund paid brokerage commissions and other fees of \$1,310 to CIBC WM; the Fund did not pay any brokerage commissions or other fees to CIBC World Markets Corp. Spreads associated with fixed income and other securities are not ascertainable and, for that reason, cannot be included when determining these amounts.

Fund Transactions

The Fund may enter into one or more of the following transactions in reliance on the standing instructions rendered by the Independent Review Committee (IRC):

- trade in securities of CIBC;
- invest in the securities of issuers for which CIBC WM, CIBC World Markets Corp. or another related party acts as an underwriter during the distribution of such securities and the 60-day period following the conclusion of such distribution of the underwritten securities to the public;
- purchase of securities from or sell securities to CIBC WM, CIBC World Markets or another related party, where it is acting as principal; and
- purchases or sales of securities of an issuer from or to another investment fund managed by the Manager or an affiliate of the Manager.

The relevant standing instructions require that the transactions (i) be made free from any influence of an entity related to the Manager or any sub-advisor and without taking into account any consideration relevant to an entity related to the Manager or any sub-advisor, (ii) represent the business judgment of the Manager and such sub-advisor, uninfluenced by considerations other than the best interests of the Fund, (iii) be conducted in accordance with the Manager's policies and procedures, and (iv) achieve a fair and reasonable result for the Fund. The Manager is required to report a material breach in respect of the standing instructions to the IRC.

Custodian

The custodian holds all cash and securities for the Fund and ensures that those assets are kept separate from any other cash or securities that the custodian may be holding. CIBC Mellon Trust Company is the custodian of the Fund (the *Custodian*). The fees for the services of the Custodian are paid by the Manager and charged to the Fund on a recoverable basis.

Service Provider

CIBC Mellon Global Securities Services Company (CIBC GSS) provides certain services to the Fund, including securities lending, fund accounting and reporting, and portfolio valuation. Such servicing fees are paid by the Manager, and charged to the Fund on a recoverable basis. CIBC indirectly owns a 50% interest in CIBC GSS.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the periods ended August 31.

Net Assets, end of period	\$26.98	\$26.78	\$26.37	\$32.90	\$35.92

¹ This information is derived from the Fund's audited annual financial statements. The net assets per unit presented in the financial statements differs from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The total increase (decrease) from operations is based on the weighted average number of units outstanding during the period.

³ Distributions were paid in cash, reinvested in additional units of the Fund, or both.

⁴ This information is presented as at August 31 of the period(s) shown.

⁵ Management expense ratio is based on the total expenses of the fund (excluding commissions and other portfolio transaction costs), incurred by or allocated to a class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.

⁶ The decision to waive and/or absorb management fees and operating expenses is at the discretion of the Manager. The practice of waiving and/or absorbing management fees and operating expenses may continue indefinitely or may be terminated at any time without notice to unitholders.

⁷ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the daily average net asset value during the period. Spreads associated with fixed income securities trading are not ascertainable and, for that reason, are not included in the trading expense ratio calculation.

⁸ The portfolio turnover rate indicates how actively the portfolio sub-advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by a fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

The Fund, either directly or indirectly, pays one or more annual management fees to CAMI in consideration for the provision of, or arranging for the provision of, management, distribution, and portfolio advisory services. These fees are calculated as a percentage of the Fund's class level net asset value and are calculated and credited daily, and paid monthly. The Fund is required to pay all applicable taxes on the management fees.

The following table shows a breakdown of the services received in consideration of the management fees, as a percentage of the management fees collected from the Fund for the period ended August 31, 2011. These amounts do not include waived fees or absorbed expenses. CAMI charges a management fee directly to, or as directed by, Class O unitholders, or dealers and discretionary managers on behalf of Class O unitholders.

Past Performance

The performance data provided assumes reinvestment of distributions only and does not take into account sales, redemption, distribution, or other optional charges payable by any unitholder that would have reduced returns. Past performance does not necessarily indicate how a fund will perform in the future.

The Fund's returns are after the deduction of fees and expenses, and the difference in returns between classes is primarily due to the difference in management expense ratio. See the section entitled *Financial Highlights* for the management expense ratio.

Year-by-Year Returns

These bar charts show the annual performance of each class of units of the Fund for each of the periods shown, and illustrates how the performance has changed from period to period. These bar charts show, in percentage terms, how an investment made on September 1 would have increased or decreased by August 31, unless otherwise indicated.

Class A Units

^aReturn is for the period from January 1 to December 31 of the year shown.

^b2006 return is for the period from January 1, 2006 to August 31, 2006.

Class F Units

^a2005 return is for the period from November 24, 2005 to December 31, 2005.

^b2006 return is for the period from January 1, 2006 to August 31, 2006.

Class O Units

^a2005 return is for the period from July 12, 2005 to December 31, 2005.

^b2006 return is for the period from January 1, 2006 to August 31, 2006.

Annual Compound Returns

This table shows the annual compound return of each class of units of the Fund for each indicated period ended on August 31, 2011. The annual compound total return is also compared to the Fund's benchmark(s).

The Fund's blended benchmark (*Blended Benchmark*) is comprised of the following:

- 75% S&P/TSX Composite Index
- 25% MSCI World Index

	1 Year	3 Years	5 Years	Since 10 Years* or Inception*
