### Management Discussion of Fund Performance

#### Investment Objective and Strategies

**Investment Objective:** Renaissance Global Resource Fund (the *Fund*) seeks to obtain long-term growth through capital appreciation consistent with preservation of capital by investing primarily in a diversified portfolio of equity securities or securities convertible to equity securities of companies around the world involved in or indirectly dependent on the resource industry.

**Investment Strategies:** The Fund invests primarily in global equities within the materials and energy sectors that can be expected to outperform over the short and long term. The Fund gives primary focus to the oil and gas, paper and forest products, metals and minerals, and gold and precious metals industries.

#### Risk

The Fund is a natural resources equity fund that is suitable for investors who can tolerate high investment risk.

For the period ended August 31, 2011, the Fund's overall level of risk remains as discussed in the Fund's simplified prospectus.

#### Results of Operations

The portfolio sub-advisor of the Fund is Front Street Investment Management Inc. (*the sub-advisor*). The commentary that follows reflects the views of the sub-advisor and provides a summary of the results of operations for the period ended August 31, 2011. All dollar figures are expressed in thousands, unless otherwise indicated.

- The Fund's net asset value increased by 76% during the period, from \$34,399 as at August 31, 2010 to \$60,660 as at August 31, 2011. Net sales of \$23,976 and positive investment performance resulted in an overall increase in net asset value. In an environment of financial market volatility, commodity prices increased significantly, driving investor demand for resource sector funds.
- Class A units of the Fund posted a return of 18.9% for the period. The Fund's primary benchmark, the S&P/TSX Composite Index (the *benchmark*), returned 9.9% for the same period. The Fund return is after the deduction of fees and expenses, unlike the benchmark.

See *Past Performance* for the returns of other classes of units offered by the Fund.

- Debt concerns from a number of countries caused markets to sell off from their highs. European central Bank debt problems and the U.S. debt ceiling issues caused investor concern. Gold was a primary beneficiary trading at all-time highs, as investors sought a safe haven investment.
- Fears of an economic slowdown in China, the largest consumer of many commodities, led to selling in resource markets. Also, increasing interest rates there, primarily to battle inflation, have also caused investor concerns. This has been most apparent in base metal markets and the bulk commodities, iron and coal. The Fund's performance was hurt by exposure to this sector.
- Small-cap stocks dramatically underperformed larger-cap stocks in the second half of the period as investors sought the perceived safety and liquidity of larger issuers. The Fund is weighted more towards intermediate and junior companies.
- Rising cost structures throughout the resource industry have been cutting into corporate profitability. Inflation of key inputs to operations such as energy and steel prices raised production costs.
- Political risk became a bigger factor in the last three months of the period, negatively affecting the Fund. Civil unrest and governments being overthrown in North Africa and the Middle East drove the share prices of companies operating in those regions down. Numerous countries also began discussing raising, or actually raising, royalties and taxes on resource industries, in an attempt to raise revenues.
- The fallout from the earthquake and nuclear disaster in Japan earlier in the year had a negative impact on the uranium producing and exploration companies in the portfolio.
- The price of West Texas oil rose to nearly US\$115 this year on the back of Middle East tensions. The Fund benefited from having a large weight in oil services companies who saw their earnings increase, as producing companies increased their exploration budgets.

## Recent Developments

### *International Financial Reporting Standards (IFRS)*

In January 2011, the Accounting Standards Board (AcSB) amended the Introduction to Part I of the CICA Handbook – Accounting to allow investment companies, which include investment funds, to adopt IFRS for the first time no later than interim and annual financial statements relating to annual periods beginning on or after January 1, 2013. Investment companies electing to defer the first time adoption may continue to apply existing Canadian generally accepted accounting principles (GAAP) until the changeover to IFRS.

The Fund will defer the first time adoption and adopt IFRS beginning September 1, 2013. As at August 31, 2011, the Manager has developed a changeover plan to meet this timetable.

## Related Party Transactions

Canadian Imperial Bank of Commerce (CIBC) and its affiliates have the following roles and responsibilities with respect to the Fund, and receive the fees described below in connection with their roles and responsibilities.

### *Manager, Trustee, and Portfolio Advisor of the Fund*

CIBC Asset Management Inc., a wholly-owned subsidiary of CIBC, is the manager, trustee, and portfolio advisor of the Fund (CAMI or the *Manager*). CAMI will receive management fees with respect to the day-to-day business and operations of the Fund, calculated based on the net asset value of each respective class of units of the Fund, as described in the section entitled *Management Fees*. As portfolio advisor, CAMI provides, or arranges to provide, investment advice and portfolio management services to the Fund. CAMI will also compensate its wholesalers in connection with their marketing activities regarding the Fund. From time to time, CAMI may provide seed capital to the Fund.

### *Distributor*

Dealers and other firms will sell the units of the Fund to investors. These dealers and other firms will include CIBC's related dealers such as the CIBC Investor's Edge discount brokerage division of CIBC Investor Services Inc. (*CIBC ISI*), the CIBC Imperial Service division of CIBC ISI, and the CIBC Wood Gundy division of CIBC World Markets Inc. (*CIBC WM*). CIBC ISI and CIBC WM are wholly-owned subsidiaries of CIBC.

CAMI may pay sales commissions and trailing commissions to these dealers and firms in connection with the sale of units of the Fund. These dealers and other firms may pay a portion of these sales commissions and trailing commissions to their advisors who sell units of the Fund to investors.

### *Brokerage Arrangements and Soft Dollars*

Portfolio sub-advisors make decisions, including the selection of markets and dealers and the negotiation of commissions, with respect to the purchase and sale of portfolio securities, certain derivative products (including futures) and the execution of portfolio transactions. Brokerage business may be allocated by portfolio sub-advisors to CIBC WM and CIBC World Markets Corp., each a subsidiary of CIBC. CIBC

WM and CIBC World Markets Corp. may also earn spreads on the sale of fixed income, other securities and certain derivative products (including forwards) to the Fund. A spread is the difference between the bid and ask prices for a security in the applicable marketplace, with respect to the execution of portfolio transactions. The spread will differ based upon various factors such as the nature and liquidity of the security.

Dealers, including CIBC WM and CIBC World Markets Corp., may also furnish goods and services, other than order execution, to portfolio sub-advisors that process trades through them (referred to in the industry as "soft-dollar" arrangements). These goods and services are paid for with a portion of brokerage commissions and assist portfolio sub-advisors with investment decision making services to the Fund or relate directly to executing portfolio transactions on behalf of the Fund. As per the terms of the portfolio sub-advisory agreements, such soft dollar arrangements are in compliance with applicable laws. In addition, CAMI may enter into commission recapture arrangements with certain dealers with respect to the Fund. Any commission recaptured will be paid to the Fund.

During the period, the Fund paid brokerage commissions and other fees of \$1,964 to CIBC WM; the Fund did not pay any brokerage commissions or other fees to CIBC World Markets Corp. Spreads associated with fixed income and other securities are not ascertainable and, for that reason, cannot be included when determining these amounts.

### *Fund Transactions*

The Fund may enter into one or more of the following transactions in reliance on the standing instructions rendered by the Independent Review Committee (*IRC*):

- trade in securities of CIBC;
- invest in the securities of issuers for which CIBC WM, CIBC World Markets Corp. or another related party acts as an underwriter during the distribution of such securities and the 60-day period following the conclusion of such distribution of the underwritten securities to the public;
- purchase of securities from or sell securities to CIBC WM, CIBC World Markets or another related party, where it is acting as principal; and
- purchases or sales of securities of an issuer from or to another investment fund managed by the Manager or an affiliate of the Manager.

The relevant standing instructions require that the transactions (i) be made free from any influence of an entity related to the Manager or any sub-advisor and without taking into account any consideration relevant to an entity related to the Manager or any sub-advisor, (ii) represent the business judgment of the Manager and such sub-advisor, uninfluenced by considerations other than the best interests of the Fund, (iii) be conducted in accordance with the Manager's policies and procedures, and (iv) achieve a fair and reasonable result for the Fund. The Manager is required to report a material breach in respect of the standing instructions to the IRC.

*Custodian*

The custodian holds all cash and securities for the Fund and ensures that those assets are kept separate from any other cash or securities that the custodian may be holding. CIBC Mellon Trust Company is the custodian of the Fund (the *Custodian*). The fees for the services of the Custodian are paid by the Manager and charged to the Fund on a recoverable basis.

*Service Provider*

CIBC Mellon Global Securities Services Company (*CIBC GSS*) provides certain services to the Fund, including securities lending, fund accounting and reporting, and portfolio valuation. Such servicing fees are paid by the Manager, and charged to the Fund on a recoverable basis. CIBC indirectly owns a 50% interest in CIBC GSS.

## Financial Highlights

<sup>1</sup> This information is derived from the Fund's audited annual financial statements. The net assets per unit presented in the financial statements differs from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.

<sup>2</sup> Net assets and distributions are based on the actual number of units outstanding at the relevant time. The total increase (decrease) from operations is based on the weighted average number of units outstanding during the period.

<sup>3</sup> Distributions were paid in cash, reinvested in additional units of the Fund, or both.

<b>Net Asset Value per Unit</b>	\$17.22	\$14.49	\$11.45	\$13.82	\$14.79

<sup>4</sup> This information is presented as at August 31 of the period(s) shown.

<sup>5</sup> Management expense ratio is based on the total expenses of the fund (excluding commissions and other portfolio transaction costs), incurred by or allocated to a class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.

<sup>6</sup> The decision to waive and/or absorb management fees and operating expenses is at the discretion of the Manager. The practice of waiving and/or absorbing management fees and operating expenses may continue indefinitely or may be terminated at any time without notice to unitholders.

<sup>7</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the daily average net asset value during the period. Spreads associated with fixed income securities trading are not ascertainable and, for that reason, are not included in the trading expense ratio calculation.

<sup>8</sup> The portfolio turnover rate indicates how actively the portfolio sub-advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by a fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Management Fees

The Fund, either directly or indirectly, pays one or more annual management fees to CAMI in consideration for the provision of, or arranging for the provision of, management, distribution, and portfolio advisory services. These fees are calculated as a percentage of the Fund's class level net asset value and are calculated and credited daily, and paid monthly. The Fund is required to pay all applicable taxes on the management fees.

The following table shows a breakdown of the services received in consideration of the management fees, as a percentage of the management fees collected from the Fund for the period ended August 31, 2011. These amounts do not include waived fees or absorbed expenses. CAMI charges a management fee directly to, or as directed by, Class O unitholders, or dealers and discretionary managers on behalf of Class O unitholders.

	Class A Units	Class F Units
Sales and trailing commissions paid to dealers	46.70%	0.00%
General administration, investment advice, and profit	53.30%	100.00%

## Past Performance

The performance data provided assumes reinvestment of distributions only and does not take into account sales, redemption, distribution, or other optional charges payable by any unitholder that would have reduced returns. Past performance does not necessarily indicate how a fund will perform in the future.

The Fund's returns are after the deduction of fees and expenses, and the difference in returns between classes is primarily due to the difference in management expense ratio. See the section entitled *Financial Highlights* for the management expense ratio.

## Year-by-Year Returns

These bar charts show the annual performance of each class of units of the Fund for each of the periods shown, and illustrates how the performance has changed from period to period. These bar charts show, in percentage terms, how an investment made on September 1 would have increased or decreased by August 31, unless otherwise indicated.

### Class A Units
