Management Discussion of Fund Performance

Investment Objective and Strategies

Investment Objective: Renaissance Optimal Global Equity Portfolio (the *Fund*) seeks to obtain long-term capital appreciation by investing primarily in units of global and/or Canadian mutual funds (the *Underlying Funds*).

Investment Strategies: The Fund invests primarily in units of mutual funds managed by the Manager or its affiliates.

Risk

The Fund is a global equity fund that is suitable for investors who can tolerate medium investment risk.

During the period ended August 31, 2011, the Fund's risk classification was changed from 'average' to 'medium' to reflect The Investment Funds Institute of Canada's revised risk categories. Although the risk classification changed, the overall level of risk remains as discussed in the Fund's simplified prospectus.

Results of Operations

The Fund invests in a combination of direct investments in other investment funds (individually, an *Underlying Fund*, and collectively, the *Underlying Funds*). The commentary that follows provides a summary of the results of operations for the period ended August 31, 2011. All dollar figures are expressed in thousands, unless otherwise indicated.

- The Fund's net asset value decreased by 9% during the period, from \$26,205 as at August 31, 2010 to \$23,860 as at August 31, 2011. Net redemptions of \$4,004 were partially offset by positive investment performance, contributing to this decrease in net asset value.
- Class A units of the Fund posted a return of 5.7% for the period. The Fund's primary benchmark, the MSCI World Index (the *benchmark*), returned 5.5% for the same period. The Fund return is after the deduction of fees and expenses, unlike the benchmark. See *Past Performance* for the returns of other classes of units offered by the Fund.
- The Fund's performance may differ from that of its benchmark as it contains exposure to a selection of five specialized global equity

strategies through its investments in the Underlying Funds. The period saw a measure of financial market volatility and, largely influenced by macro economic and geopolitical concerns, some investors moved between equities and perceived safe haven gold and the bond market. In this environment, four of the Fund's five Underlying Funds delivered positive absolute returns and, on a net basis, Underlying Funds delivered a positive return for the Fund.

Recent Developments

International Financial Reporting Standards (IFRS)

In January 2011, the Accounting Standards Board (AcSB) amended the Introduction to Part I of the CICA Handbook – Accounting to allow investment companies, which include investment funds, to adopt IFRS for the first time no later than interim and annual financial statements relating to annual periods beginning on or after January 1, 2013. Investment companies electing to defer the first time adoption may continue to apply existing Canadian generally accepted accounting principles (GAAP) until the changeover to IFRS.

The Fund will defer the first time adoption and adopt IFRS beginning September 1, 2013. As at August 31, 2011, the Manager has developed a changeover plan to meet this timetable.

Related Party Transactions

Canadian Imperial Bank of Commerce (CIBC) and its affiliates have the following roles and responsibilities with respect to the Fund, and receive the fees described below in connection with their roles and responsibilities.

Manager, Trustee, and Portfolio Advisor of the Fund

CIBC Asset Management Inc., a wholly-owned subsidiary of CIBC, is the manager, trustee, and portfolio advisor of the Fund (CAMI or the *Manager*). CAMI will receive management fees with respect to the day-to-day business and operations of the Fund, calculated based on the net asset value of each respective class of units of the Fund, as described in the section entitled *Management Fees*. As portfolio advisor, CAMI provides, or arranges to provide, investment advice

and portfolio management services to the Fund. CAMI will also compensate its wholesalers in connection with their marketing activities regarding the Fund. From time to time, CAMI may provide seed capital to the Fund.

Distributor

Dealers and other firms will sell the units of the Fund to investors. These dealers and other firms will include CIBC's related dealers such as the CIBC Investor's Edge discount brokerage division of CIBC Investor Services Inc. (*CIBC ISI*), the CIBC Imperial Service division of CIBC ISI, and the CIBC Wood Gundy division of CIBC World Markets Inc. (*CIBC WM*). CIBC ISI and CIBC WM are wholly-owned subsidiaries of CIBC.

CAMI may pay sales commissions and trailing commissions to these dealers and firms in connection with the sale of units of the Fund. These dealers and other firms may pay a portion of these sales commissions and trailing commissions to their advisors who sell units of the Fund to investors.

Brokerage Arrangements and Soft Dollars

Portfolio sub-advisors make decisions, including the selection of markets and dealers and the negotiation of commissions, with respect to the purchase and sale of portfolio securities, certain derivative products (including futures) and the execution of portfolio transactions. Brokerage business may be allocated by portfolio sub-advisors to CIBC WM and CIBC World Markets Corp., each a subsidiary of CIBC. CIBC WM and CIBC World Markets Corp. may also earn spreads on the sale of fixed income, other securities and certain derivative products (including forwards) to the Fund. A spread is the difference between the bid and ask prices for a security in the applicable marketplace, with respect to the execution of portfolio transactions. The spread will differ based upon various factors such as the nature and liquidity of the security.

Dealers, including CIBC WM and CIBC World Markets Corp., may also furnish goods and services, other than order execution, to portfolio sub-advisors that process trades through them (referred to in the industry as "soft-dollar" arrangements). These goods and services are paid for with a portion of brokerage commissions and assist portfolio sub-advisors with investment decision making services to the Fund or relate directly to executing portfolio transactions on behalf of the Fund. As per the terms of the portfolio sub-advisory agreements, such soft dollar arrangements are in compliance with applicable laws. In addition, CAMI may enter into commission recapture arrangements with certain dealers with respect to the Fund. Any commission recaptured will be paid to the Fund.

During the period, the Fund did not pay any brokerage commissions or other fees to CIBC WM or CIBC World Markets Corp. Spreads associated with fixed income and other securities are not ascertainable and, for that reason, cannot be included when determining these amounts.

Custodian

The custodian holds all cash and securities for the Fund and ensures that those assets are kept separate from any other cash or securities

that the custodian may be holding. CIBC Mellon Trust Company is the custodian of the Fund (the *Custodian*). The fees for the services of the Custodian are paid by the Manager and charged to the Fund on a recoverable basis.

Service Provider

CIBC Mellon Global Securities Services Company (*CIBC GSS*) provides certain services to the Fund, including securities lending, fund accounting and reporting, and portfolio valuation. Such servicing fees are paid by the Manager, and charged to the Fund on a recoverable basis. CIBC indirectly owns a 50% interest in CIBC GSS.

Net Asset Value per Unit	\$6.50	\$6.15	\$5.93	\$6.57	\$7.37

⁴ This information is presented as at August 31 of the period(s) shown.

⁵ Management expense ratio is based on the total expenses of the fund (excluding commissions and other portfolio transaction costs), incurred by or allocated to a class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.

⁶ The decision to waive and/or absorb management fees and operating expenses is at the discretion of the Manager. The practice of waiving and/or absorbing management fees and operating expenses may continue indefinitely or may be terminated at any time without notice to unitholders.

⁷ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the daily average net asset value during the period. Spreads associated with fixed income securities trading are not ascertainable and, for that reason, are not included in the trading expense ratio calculation.

⁸ The portfolio turnover rate indicates how actively the portfolio sub-advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by a fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Net Asset Value per Unit	\$8.65	\$7.96	\$7.48	\$8.05	\$8.78

⁴ This information is presented as at August 31 of the period(s) shown.

⁵ Management expense ratio is based on the total expenses of the fund (excluding commissions and other portfolio transaction costs), incurred by or allocated to a class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.

⁶ The decision to waive and/or absorb management fees and operating expenses is at the discretion of the Manager. The practice of waiving and/or absorbing management fees and operating expenses may continue indefinitely or may be terminated at any time without notice to unitholders.

⁷ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the daily average net asset value during the period. Spreads associated with fixed income securities trading are not ascertainable and, for that reason, are not included in the trading expense ratio calculation.

⁸ The portfolio turnover rate indicates how actively the portfolio sub-advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by a fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

The Fund, either directly or indirectly, pays one or more annual management fees to CAMI in consideration for the provision of, or arranging for the provision of, management, distribution, and portfolio advisory services. These fees are calculated as a percentage of the Fund's class level net asset value and are calculated and credited daily, and paid monthly. The Fund is required to pay all applicable taxes on the management fees.

Where a Fund invests in securities of other mutual funds, no management fees or incentive fees are payable by the Fund that, to a reasonable person, would duplicate a fee payable by the Underlying Fund for the same service.

The following table shows a breakdown of the services received in consideration of the management fees, as a percentage of the management fees collected from the Fund for the period ended August 31, 2011. These amounts do not include waived fees or absorbed expenses. CAMI charges a management fee directly to, or as directed by, Class O unitholders, or dealers and discretionary managers on behalf of Class O unitholders.

Past Performance

The performance data provided assumes reinvestment of distributions only and does not take into account sales, redemption, distribution, or other optional charges payable by any unitholder that would have reduced returns. Past performance does not necessarily indicate how a fund will perform in the future.

Past performance for Class T6, Select-T4, Select-T8, Elite, Elite-T4, Elite-T6, and Elite-T8 units has not been shown because, as at August 31, 2011, there were no units of these classes in existence.

The Fund's returns are after the deduction of fees and expenses, and the difference in returns between classes is primarily due to the difference in management expense ratio. See the section entitled *Financial Highlights* for the management expense ratio.
