## Why invest in this ETF?

The CIBC Global Growth ETF is an ideal ETF solution for investors looking for global diversification with the expertise of professional active management. This ETF provides investors with:

### Enhanced diversification

Diversifying a portfolio with global investments improves your risk-return profile while investing without bias among regions, countries and sectors.

CGLO provides access to global companies that offer attractive valuations and prospects for growth and that are considered capable of generating superior real returns over the long-term.

### An unconstrained approach for growth

This ETF is built bottom-up, stock by stock. The sector and geographic allocation is a reflection of the manager's independent judgment.

This unconstrained approach typically leads to a portfolio with little resemblance to any stock market index. The strategy employed to aim to achieve this is to buy and hold between 40-60 companies capable of compounding wealth consistently.

### Access to an experienced active portfolio management team

Benefit from an active portfolio management team with a 30 year history of navigating market cycles.

Combine the expertise of professional portfolio managers with the flexibility and efficiency of an ETF. Active ETFs aim to outperform their benchmarks and can provide better risk management for your portfolio.
