

CIBC CORE FIXED INCOME POOL

December 31, 2023

Strategic asset allocation

Short-term debt	33%
Canadian, global government and corporate debt	49%
High-yield and multi-sector debt	10%
Emerging markets debt and currency	8%

A redefined core fixed income solution

The CIBC Core Fixed Income Pool is composed of a diverse mix of mutual funds and exchange-traded funds (ETFs) and is designed to deliver better risk adjusted returns and attractive yields.

- Largest exposure is to Canadian, global government and corporate debt to provide stability, yield and some potential for capital appreciation.
- Exposure to short-term debt to reduce interest rate risk and manage duration relative to the FTSE Canada Universe Bond Index.
- Exposure to high-yield debt, emerging markets debt and currency to help enhance yield, diversification and capital appreciation.
- High-yield debt exposure will typically range between 10% and 20%.
- Tactical management is employed to adjust the asset mix over the short- to medium-term based on changes in the market outlook.
