CIBC Ares Strategic Income Fund

What is private credit?

Private credit covers a broad spectrum of strategies that spans capital structure and borrower types. These range from senior secured loans for blue-chip corporate borrowers, to junior unsecured credit for financing new building construction, to loans against specialized assets. Different loans carry different types and levels of risk—and can generate a range of returns commensurate to their risk.

Corporate Debt & Securities

- Senior Bank Debt
- Claims
- Distressed Debt

Portfolios & Orphaned Assets

- Other Securities
- Legal Assets
- Small and Medium Enterprise (SME) Loans
- Consumer Receivables
- Whole Loans

Real Estate

- Real Estate Loans
- Commercial Mortgage-Backed Securities (CMBS)

Structured Finance

- Commercial Real Estate (CRE)
- Net Lease
- Asset Backed Securities (ABS)
- Residential Mortgage-Backed Securities (RMBS)
- Structured Investment Vehicles (SIVs)
- Collateralized Loan Obligations (CLOs)
- Rediscount/Specialty Finance

Lending

- Rescue Financing
- Corporate Loans

As an asset class, private credit is garnering interest from a diverse investor audience, due to its unique value proposition and qualities, namely, capital preservation, income generation, enhanced yield generation relative to publicly traded fixed income, and low correlation with other traditional assets.

Why invest in private credit?

Private credit can be a powerful complement to traditional fixed income strategies and other asset classes, offering potential for income generation, resilience, return enhancement, and diversification.

Income generation

Over the past decade, the asset class has generated a higher yield than most other asset classes, including public high yield and broadly syndicated loans.

Borrowers have been willing to pay a premium for the certainty of execution, agility, and customization that private lenders offer.

Resilience

The ability to select investments without the need to manage to a benchmark can be a potential downside mitigant in an environment of increased dispersion, slowing growth, tightening monetary policy, and headwinds to profitability.

Deep access to company records received by private lenders enables stronger due diligence and documentation than may be the case in public markets.

Return enhancement

Private credit instruments are typically tied to floating rates. When interest rates rise, those increases are automatically reflected in the private credit coupon. This dynamic makes floating-rate debt less sensitive to interest rates compared to fixed-rate bonds, which typically lose value as interest rates rise.

In a rising-interest rate environment, private credit may find its floating rate nature a further advantage.

Diversification

Some private credit strategies are most directly exposed to the economic health of corporate borrowers, others to the consumer, others to real assets.

The proprietary lending opportunities the asset classes affords itself, lowers market volatility exposure.

Introducing the CIBC Ares Strategic Income Fund

The CIBC Ares Strategic Income Fund (The “Fund”) provides Canadian accredited investors with the opportunity to invest in the Ares Strategic Income Fund (“ASIF” or the “Master Fund”), a private credit solution that benefits from Ares Credit Group, a leading and differentiated credit platform.

ASIF seeks to generate current income, while maintaining the potential for capital appreciation and attractive risk-adjusted returns through market cycles. The Master Fund primarily invests in directly originated, senior secured, floating rate loans to US companies¹.

ASIF’s accessible structure is designed to leverage the power of the entire Ares credit platform with a core anchor allocation to senior secured directly originated loans to offer investors an income-oriented solution with a focus on downside protection². The Fund seeks to complement traditional fixed income strategies by providing a yield enhancement opportunity and portfolio diversification throughout changing market and interest rate cycles.

Key fund features

Focus on income through distributions

- Core income solution provides yield enhancement opportunity.
- Expected monthly distributions².

Defensive portfolio

- Focus on first lien investments¹.
- Diverse portfolio with limited concentration levels across issuer, industry, and sponsor to seek optimal risk-return profile.

Access to Ares’ experienced credit platform

- The CIBC Ares Strategic Income Fund is currently the only Canadian Feeder Fund to provide exclusive access to ASIF at an affordable entry point.
- Opportunity to gain access to ASIF, which is advised by an experienced manager in credit markets.
- A leader in the direct lending space.

Beneficial structure³

- Monthly subscriptions.
- Expected quarterly liquidity.
- Canadian dollar operating currency. 100% hedged to minimize currency implications.

CIBC Ares Strategic Income Fund structure

The CIBC Ares Strategic Income Fund is managed by CIBC Asset Management Inc. The Fund is offered to accredited Canadian investors, granting access to the Master Fund.

Ares Strategic Income Fund investment focus

The Master Fund is designed to leverage the power of the entire Ares credit platform with a core anchor allocation to senior secured directly originated loans to offer investors an income-oriented solution with a focus on downside protection⁴.

Typical portfolio company characteristics⁵

- High free cash flow
- Industry leaders
- High barriers to entry
- Non-cyclical industries
- Franchise businesses
- Top-tier management team

Loan characteristics⁵

- Primarily focused on directly originated senior secured loans
- Predominately floating rate
- Strong contractual protections
- Focus on financial covenants
- Base rate floors
- Appropriate LTV
- Relatively short duration

Illustrative capital structure⁶

Global direct sourcing drives proprietary deal flow and outcomes.

- Broad market coverage provides a relative value lens and asset selectivity.
- Lead/active role helps improve control over outcomes.

Information edge

Cross-platform collaboration enables valuable information sharing.

- Cross-vertical sourcing, due diligence and idea sharing.
- Cross-populating ICs with diverse professionals.
- Global markets committees sharing industry trends.

Scaled portfolio

Large existing portfolio expected to provide pipeline of new activity.¹¹

- Flexible capital solutions.
- Power of incumbency.
- Source new opportunities across Ares' platform.

Integrating the fund within a portfolio

Private credit is generally sought out with the aim of producing better risk-adjusted returns and/or achieving a higher, more sustainable rate of income relative to what can be achieved by relying exclusively on publicly traded fixed income.

In integrating the CIBC Ares Strategic Income Fund within an existing portfolio, there are guiding principles that should be considered, namely:

- **Overall asset class allocation:** The higher the determined allocation to traditional fixed income, the higher the potential allocation to private credit strategies in place of some portion of public fixed income exposure.
- **Need for income:** The higher the income requirement, the more attractive private credit becomes. It's important to review the risk profile of a given strategy as well as individual risk tolerances when deciding to integrate private credit.
- **Liquidity needs:** The more predictable your cash needs and the lower your near- and medium-term liquidity requirements, the higher the potential allocation to private markets.

The expertise of CIBC Asset Management

At CIBC Asset Management, we believe every customized investment solution begins with research and rigour. We specialize in a variety of investment solutions such as equities, fixed income, currency management, liability-driven investments, asset allocation and responsible investments.

Across a spectrum of investment solutions, we commit to robust research. Dedicated sector and regional analysts focus on industry research and security-specific idea generation. Our investment professionals leverage deep and diverse expertise by sharing proprietary research across asset class teams. By sharing insight across asset class teams, we maximize opportunities to add value to our client portfolios.
