

Interim Management Report of Fund Performance

for the period ended February 28, 2022

All figures are reported in Canadian dollars unless otherwise noted.

This interim management report of fund performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the investment fund. You can get a copy of the interim financial report or annual financial statements at your request, and at no cost, by calling toll-free at 1-888-888-3863, by writing to us at Renaissance Investments, 1500 Robert-Bourassa Boulevard, Suite 800, Montreal, QC, H3A 3S6, or by visiting our website at www.renaissanceinvestments.ca or SEDAR at www.sedar.com.

Unitholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Results of Operations

CIBC Multi-Asset Absolute Return Strategy's (referred to as the *Fund*) Portfolio Advisor is CIBC Asset Management Inc. (referred to as *CAMI*, the *Manager* or the *Portfolio Advisor*). The commentary that follows provides a summary of the results of operations for the six-month period ended February 28, 2022. All dollar figures are expressed in thousands, unless otherwise indicated.

The Fund's net asset value increased by 8% during the period, from \$2,260,754 as at August 31, 2021 to \$2,446,410 as at February 28, 2022. Net sales of \$353,834 were partially offset by negative investment performance, resulting in an overall increase in net asset value.

Series A units of the Fund posted a return of -7.6% for the period. The Fund's benchmark, the FTSE Canada 91 Day T-Bill Index (referred to as the benchmark), returned 0.1% for the same period. The Fund's return is after the deduction of fees and expenses, unlike the benchmark's return. See the section *Past Performance* for the returns of the other series of units offered by the Fund.

The COVID-19 pandemic continued to be a major influence on the global economy and on financial markets during the period. With the emergence of COVID-19 vaccines, global financial markets reopened, supporting above-trend growth and inflation. This also caused interest rates to rise throughout 2021. With vaccination campaigns that were relatively successful (depending on the country), each successive wave of infection proved to have less impact on economic activity. The U.S. Federal Reserve Board (referred to as the *Fed*) started the process of tapering its asset-purchase program and communicated that it would soon follow with increases in its policy rate.

In the latter half of 2021, yield curves flattened, as short-term bond yields rose sharply. Investors were adjusting to the Bank of Canada and Fed setting the stage for interest rate increases in 2022. However, long-term yields declined in the fourth quarter of 2021. Some analysts cited concerns over a possible central bank policy error, in which interest rate increases happen too soon or too fast.

The uncertainty of the extent of central bank actions, coupled with the Russia-Ukraine conflict, saw credit spreads (the yield differential

between securities of similar maturity but differing credit quality) rise in early 2022. In addition, sectors posted negative returns. The corporate bond sector was the worst performer, followed by the provincial sector, with Government of Canada bonds performing the best.

After a strong recovery driven by the reopening of economies, the momentum of economic growth began to wane. Growth remained robust but was no longer improving. At the same time, inflation picked up. Some of the high inflation can be attributed to an easy comparison to prices that were depressed the previous year. There were also supply bottlenecks that pushed prices higher in many industries.

The Chinese economic cycle slowed as the sentiment toward credit turned negative. The unexpected development that amplified the slowdown was the tightening of regulations for the information technology and real estate sectors. There were signs that the effects of policy tightening reached their highest "pain threshold." As a result, Chinese leadership is expected to take some action to support the economy.

Geopolitical tensions in Ukraine grew as Russia built up its military presence around the country. Ultimately, Russia began a military invasion of Ukraine, which was answered with severe economic and financial sanctions from the West.

A slight overweight exposure to global bonds detracted from the Fund's performance. Central banks signaled that the accommodative monetary policies implemented during the pandemic would come to an end earlier than expected. As a result, yields rose significantly. A moderate overweight exposure to Russian assets detracted from the Fund's performance. Russian equities, bonds and currency all declined sharply following the invasion of Ukraine.

A slight overweight allocation to commodities contributed to the Fund's performance. The global economy expanded rapidly in 2021 and inflation pressure became increasingly acute. This caused commodity prices to rapidly rise.

The Portfolio Advisor increased the Fund's exposure to industrial metals. Robust growth, rising inflation pressure and a structural deficit in commodity supply favoured strong commodity prices. The Fund's

allocation to developed countries' government bonds was also increased. Growth is expected to slow down and disappoint expectations. Bond yields moved up significantly, changing their relative attractiveness.

Leverage

Leverage occurs when the Fund's aggregate exposure to underlying assets is greater than the amount invested, but may not exceed 300% of the Fund's NAV. Aggregate exposure is the sum of the following:

1. the aggregate value of the Fund's outstanding indebtedness under any borrowing agreements;
2. the aggregate market value of all securities sold short by the Fund; and
3. the aggregate notional amount of the Fund's specified derivatives positions excluding any specified derivatives used for hedging purposes.

During the six-month period ending February 28, 2022, the Fund's leverage position ranged from 144.1% to 246.3% of the Fund's NAV. The low end of the range occurred in October 7, 2021 when the Fund's strategy dictated that less leverage was required to achieve the Fund's target risk-return objectives. The high end of the range was reached in February 15, 2022 when the Fund deployed a greater use of leverage to achieve its target risk-return objectives. The Fund's derivative usage provided the only source of leverage during the six-month period ended February 28, 2022. The Fund's aggregate notional value of derivatives was reduced by 31.6%, which represents the notional value of derivatives used for hedging purposes during the period.

The Fund's lower portfolio turnover rate was due to the Portfolio Advisor's satisfaction with the positioning of the Fund.

Recent Developments

The escalating conflict between Ukraine and the Russian Federation has resulted in significant volatility and uncertainty in financial markets. As at February 28, 2022, 1.4% of the net assets of Fund was exposed to Russian securities. These positions have materially declined in value in the subsequent period. It is unclear what further actions may be taken by governments and the resulting impact on global economies, businesses and financial markets. While the situation remains fluid, the Manager continues to monitor ongoing developments and the impact to investment strategies.

Effective January 1, 2022, the annual management fees were reduced from 1.90% to 1.70% for Series A units and from 0.90% to 0.70% for Series F and Series S units of the Fund. In addition, the fixed administration fees were reduced from 0.20% to 0.15% for Series A and Series F units of the Fund.

The COVID-19 pandemic and the restrictions imposed by governments around the world to limit its spread have disrupted the global economy and financial markets in unprecedented and unpredictable ways. The COVID-19 outbreak may adversely affect the performance of the Fund.

Related Party Transactions

Canadian Imperial Bank of Commerce (referred to as *CIBC*) and its affiliates have the following roles and responsibilities with respect to

the Fund, and receive the fees described below in connection with their roles and responsibilities.

Manager, Trustee, and Portfolio Advisor of the Fund

CAMI, a wholly-owned subsidiary of CIBC, is the Fund's Manager, Trustee, and Portfolio Advisor. As Manager, CAMI receives management fees with respect to the Fund's day-to-day business and operations, calculated based on the net asset value of each respective series of units of the Fund as described in *Management Fees*.

The Manager pays the Fund's operating expenses (other than certain Fund costs) in respect of Series A, Series F and Series S units, which may include but are not limited to, operating and administrative costs; regulatory fees; audit, and legal fees and expenses; trustee, safekeeping, custodial, and any agency fees; and investor servicing costs and costs of unitholder reports, prospectuses, Fund Facts, and other reports, in exchange for the Fund paying a fixed rate administration fee (plus applicable GST/HST) to the Manager with respect to those series of units. For Series O units, no fixed administration fee will be charged. The Manager pays the Fund's operating expenses (other than certain Fund costs) allocated to Series O units of the Fund. The fixed administration fee payable by the Fund, may, in any particular period, exceed or be lower than the expenses we incur in providing such services to the Fund.

As Trustee, CAMI holds title to the Fund's property (cash and securities) on behalf of its unitholders.

As Portfolio Advisor, CAMI provides, or arranges to provide for, investment advice and portfolio management services to the Fund.

CAMI also compensates dealers in connection with their marketing activities regarding the Fund. From time to time, CAMI as Portfolio Advisor may invest in units of the Fund on behalf of other investment funds.

Distributor

Dealers and other firms sell units of the Fund to investors. These dealers and other firms include CAMI's related dealers such as the CIBC Investor's Edge discount brokerage division of CIBC Investor Services Inc. (referred to as *CIBC ISI*), the CIBC Imperial Service division of CIBC ISI, and the CIBC Wood Gundy division of CIBC World Markets Inc. (referred to as *CIBC WM*). CIBC ISI and CIBC WM are wholly-owned subsidiaries of CIBC.

CAMI may pay sales commissions and trailing commissions to these dealers and firms in connection with the sale of units of the Fund. These dealers and other firms may pay a portion of these sales commissions and trailing commissions to their advisors who sell units of the Fund to investors.

Brokerage Arrangements and Soft Dollars

The Portfolio Advisor makes decisions, including the selection of markets and dealers and the negotiation of commissions, with respect to the purchase and sale of portfolio securities, certain derivative products and the execution of portfolio transactions. Brokerage business may be allocated by the Portfolio Advisor to CIBC WM and CIBC World Markets Corp., each a subsidiary of CIBC. CIBC WM and

CIBC World Markets Corp. may also earn spreads on the sale of fixed income securities, other securities, and certain derivative products to the Fund. A spread is the difference between the bid and ask prices for a security in the applicable marketplace, with respect to the execution of portfolio transactions. The spread will differ based upon various factors such as the nature and liquidity of the security.

Dealers, including CIBC WM and CIBC World Markets Corp., may furnish goods and services, other than order execution, to the Portfolio Advisor when it processes trades through them (referred to in the industry as “soft-dollar” arrangements). These goods and services are paid for with a portion of the brokerage commissions and assist the Portfolio Advisor with investment decision-making services for the Fund or relate directly to the execution of portfolio transactions on behalf of the Fund. As per the terms of the portfolio advisory agreement, such soft dollar arrangements are in compliance with applicable laws.

In addition, the Manager may enter into commission recapture arrangements with certain dealers with respect to the Fund. Any commission recaptured will be paid to the Fund.

During the period, the Fund paid brokerage commissions and other fees of \$986,264 to CIBC WM; the Fund did not pay any brokerage commissions or other fees to CIBC World Markets Corp. Spreads associated with fixed income and other securities are not ascertainable and, for that reason, cannot be included when determining these amounts.

Fund Transactions

The Fund may enter into one or more of the following transactions (referred to as the *Related Party Transactions*) in reliance on the standing instructions issued by the Independent Review Committee (referred to as the *IRC*):

- invest in or hold equity securities of CIBC or issuers related to the Portfolio Advisor;
- invest in or hold non-exchange-traded debt securities of CIBC or an issuer related to CIBC, with terms-to-maturity of 365 days or more, issued in a primary offering and in the secondary market;
- make an investment in the securities of an issuer for which CIBC WM, CIBC World Markets Corp., or any affiliate of CIBC (referred to as a *Related Dealer* or the *Related Dealers*) acts as an underwriter during the offering of the securities or at any time during the 60-day period following the completion of the offering of such securities (in the case of a “private placement” offering, in accordance with the Private Placement Relief Order and the policies and procedures relating to such investment);
- purchase equity or debt securities from, or sell them to, a Related Dealer, where it is acting as principal;
- undertake currency and currency derivative transactions where a related party is the counterparty;
- purchase securities from or sell securities to another investment fund or a managed account managed by the Manager or an affiliate (referred to as *inter-fund trades* or *cross-trades*); and

- engage in in-specie transfers by receiving portfolio securities from, or delivering portfolio securities to, a managed account or another investment fund managed by the Manager or an affiliate, in respect of a purchase or redemption of units of the Fund, subject to certain conditions.

At least annually, the IRC reviews the Related Party Transactions for which they have issued standing instructions. The IRC is required to advise the Canadian securities regulatory authorities, after a matter has been referred to or reported to it by the Manager, if it determines that an investment decision was not made in accordance with conditions imposed by securities legislation or the IRC in any Related Party Transactions requiring its approval.

Custodian

CIBC Mellon Trust Company is the custodian of the Fund (referred to as the *Custodian*). The Custodian holds all cash and securities for the Fund and ensures that those assets are kept separate from any other cash or securities that the custodian might be holding. The Custodian also provides other services to the Fund including record-keeping and processing of foreign exchange transactions. The fees and spreads for services of the Custodian directly related to the execution of portfolio transactions by the Fund are paid by CAMI and/or dealer(s) directed by CAMI, up to the amount of the credits generated under soft dollar arrangements from trading on behalf of the Fund during that month. All other fees and spreads for the services of the Custodian are paid by the Manager. CIBC owns a 50% interest in the Custodian.

Service Provider

CIBC Mellon Global Securities Services Company (referred to as *CIBC GSS*) provides certain services to the Fund, including securities lending, fund accounting and reporting, and portfolio valuation. Such servicing fees are paid by the Manager. CIBC indirectly owns a 50% interest in CIBC GSS.

Total Distributions³	\$ 0.11	\$ 0.23	\$ 0.01	\$ 0.02
Net Assets, end of period	\$ 10.00	\$ 10.94	\$ 10.86	\$ 10.37

^a Information presented is for the period from October 22, 2018 to August 31, 2019.

^b Initial offering price.

¹ This information is derived from the Fund's audited annual and unaudited interim financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The total increase (decrease) from operations is based on the weighted average number of units outstanding during the period.

³ Distributions were paid in cash, reinvested in additional units of the Fund, or both.

Ratios and Supplemental Data - Series A Units

	2022	2021	2020	2019 ^a
Total Net Asset Value (000s)⁴	\$ 71,809	\$ 68,250	\$ 24,454	\$ 4,261
Number of Units Outstanding⁴	7,178,790	6,239,840	2,251,645	410,977
Management Expense Ratio⁵	2.18% *	2.28%	2.34%	2.41% *
Management Expense Ratio before waivers or absorptions⁶	2.18% *	2.28%	2.34%	2.41% *
Trading Expense Ratio⁷	0.22% *	0.16%	0.44%	0.33% *
Portfolio Turnover Rate⁸	52.75%	141.68%	159.00%	172.39%
Net Asset Value per Unit	\$ 10.00	\$ 10.94	\$ 10.86	\$ 10.37

^a Information presented is for the period from October 22, 2018 to August 31, 2019.

* Ratio has been annualized.

⁴ This information is presented as at February 28, 2022 and August 31 of the period(s) shown.

⁵ Management expense ratio is based on the total expenses of the fund (excluding commissions and other portfolio transaction costs), incurred by or allocated to a series of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that series during the period. The management expense ratio includes the fees attributable to exchange traded funds.

⁶ The decision to waive and/or absorb management fees and fixed administration fees is at the discretion of the Manager, as applicable. The practice of waiving and/or absorbing management fees and fixed administration fees may continue indefinitely or may be terminated at any time without notice to unitholders. The management expense ratio before waivers or absorptions includes the fees attributable to exchange traded funds.

⁷ The trading expense ratio represents total commissions and other portfolio transaction costs before income taxes expressed as an annualized percentage of the daily average net asset value during the period. Spreads associated with fixed income securities trading are not ascertainable and, for that reason, are not included in the trading expense ratio calculation.

⁸ The portfolio turnover rate indicates how actively the portfolio advisor and/or portfolio sub-advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by a fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Trading Expense Ratio⁷	0.22%*	0.16%	0.44%	0.33%*
Portfolio Turnover Rate⁸	52.75%	141.68%	159.00%	172.39%
Net Asset Value per Unit	\$ 9.93	\$ 10.87	\$ 10.74	\$ 10.22

^a Information presented is for the period from October 22, 2018 to August 31, 2019.

* Ratio has been annualized.

⁴ This information is presented as at February 28, 2022 and August 31 of the period(s) shown.

⁵ Management expense ratio is based on the total expenses of the fund (excluding commissions and other portfolio transaction costs), incurred by or allocated to a series of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that series during the period. The management expense ratio includes the fees attributable to exchange traded funds.

⁶ The decision to waive and/or absorb management fees and fixed administration fees is at the discretion of the Manager, as applicable. The practice of waiving and/or absorbing management fees and fixed administration fees may continue indefinitely or may be terminated at any time without notice to unitholders. The management expense ratio before waivers or absorptions includes the fees attributable to exchange traded funds.

⁷ The trading expense ratio represents total commissions and other portfolio transaction costs before income taxes expressed as an annualized percentage of the daily average net asset value during the period. Spreads associated with fixed income securities trading are not ascertainable and, for that reason, are not included in the trading expense ratio calculation.

⁸ The portfolio turnover rate indicates how actively the portfolio advisor and/or portfolio sub-advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by a fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

The Fund pays CAMI an annual management fee to cover the costs of managing the Fund. Management fees are based on the Fund's net asset value and are calculated daily and paid monthly. Management fees are paid to CAMI in consideration for providing, or arranging for the provision of, management, distribution, and portfolio advisory services. Advertising and promotional expenses, office overhead expenses, and trailing commissions are paid by CAMI out of the management fees received from the Fund. The Fund is required to pay applicable taxes on the management fees paid to CAMI. Refer to the simplified prospectus for the annual management fee rate for each series of units.

For Series O units, the management fee is negotiated with and paid by, or as directed by, unitholders or dealers and discretionary managers on behalf of unitholders. Such Series O management fee will not exceed the Series F unit management fee rate.

The following table shows a breakdown of the services received in consideration of the management fees, as a percentage of the management fees collected from the Fund for the period ended February 28, 2022. These amounts do not include waived fees or absorbed expenses.

	Series A	Series F	Series S
Sales and trailing commissions paid to dealers	50.23%	0.00%	0.00%
General administration, investment advice, and profit	49.77%	100.00%	100.00%

Past Performance

The performance data provided assumes reinvestment of distributions only and does not take into account sales, redemption, distribution, or other optional charges payable by any unitholder that would have reduced returns. Past performance does not necessarily indicate how a fund will perform in the future.

The Fund's returns are after the deduction of fees and expenses, and the difference in returns between series of units is primarily due to differences in the management expense ratio. See *Financial Highlights* section for the management expense ratio.

Year-by-Year Returns

These bar charts show the annual performance of each series of units of the Fund for each of the periods shown, and illustrate how the performance has changed from period to period. The bar charts show, in percentage terms, how much an investment made on September 1 would have increased or decreased by August 31, unless otherwise indicated.

Series A Units

^a 2019 return is for the period from October 22, 2018 to August 31, 2019.

^b 2022 return is for the period from September 1, 2021 to February 28, 2022.

Series F Units

^a 2019 return is for the period from October 22, 2018 to August 31, 2019.

^b 2022 return is for the period from September 1, 2021 to February 28, 2022.

Series O Units

^a 2019 return is for the period from October 22, 2018 to August 31, 2019.

^b 2022 return is for the period from September 1, 2021 to February 28, 2022.

Series S Units

^a 2019 return is for the period from October 22, 2018 to August 31, 2019.

^b 2022 return is for the period from September 1, 2021 to February 28, 2022.

Summary of Investment Portfolio (as at February 28, 2022)

The summary of investment portfolio may change due to ongoing portfolio transactions of the investment fund. A quarterly update is available by visiting www.renaissanceinvestments.ca. The Top Positions - Long Holdings table shows the Fund's 25 largest long positions. The Top Positions - Short Holdings table shows the Fund's 25 largest short positions. If the Fund holds fewer than 25 long positions or 25 short positions in total, all positions are shown. Cash and cash equivalents are shown in total as one position.

<i>Portfolio Breakdown</i>	<i>% of Net Asset Value</i>

A note on forward-looking statements

The management report of fund performance may contain forward-looking statements. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates”, or other similar wording. In addition, any statements that may be made concerning future performance, strategies, or prospects and possible future actions taken by the fund, are also forward-looking statements. Forward-looking statements are not guarantees of future performance. These statements involve known and unknown risks, uncertainties, and other factors that may cause the actual results and achievements of the fund to differ materially from those expressed or implied by such statements. Such factors include, but are not limited to: general economic, market, and business conditions; fluctuations in securities prices, interest rates, and foreign currency exchange rates; changes in government regulations; and catastrophic events.

The above list of important factors that may affect future results is not exhaustive. Before making any investment decisions, we encourage you to consider these and other factors carefully. CIBC Asset Management Inc. does not undertake, and specifically disclaims, any obligation to update or revise any forward-looking statements, whether as a result of new information, future developments, or otherwise prior to the release of the next management report of fund performance.
