

CIBC Core Fixed Income Pool

Investment Objective

The Pool will focus on generating regular income with the potential for modest long-term capital appreciation, by investing primarily in units of other mutual funds that invest in fixed income securities.

Volatility Analysis

Volatility (low-high): The lower the volatility ranking, the lower the risk of the fund. Funds with a volatility ranking of high are the most risky.

Best 1 Year Return

Series A 6.2%
3-31-2020 to 3-31-2021

Worst 1 Year Return

Series A -9.7%
6-30-2021 to 6-30-2022

Manager Commentary

Bond yields continued to rise during the second quarter of 2022 as inflationary pressures remained the dominant theme. Both the U.S. Federal Reserve Board and the Bank of Canada stated their commitment to bringing inflation under control by continuing to increase interest rates, now in larger-increment raises. This led the economy to start to weaken, with the U.S. reporting a 1.5% month-over-month drop in gross domestic product for the first quarter of 2022, the first decline since the beginning of the pandemic. Credit spreads (the difference in yield between government and corporate bonds) moved higher as growth expectations continued to be downgraded.

increases, which are now at the higher end of the manager's expected trading range, providing an opportunity to increase duration (interest rate sensitivity) by trimming CIBC Short-Term Income Fund in favour of CIBC Canadian Bond Fund. The manager reduced the fund's credit exposure by trimming Renaissance High-Yield Bond Fund. The manager added CIBC Diversified Fixed Income Fund by trimming Renaissance Flexible Yield Fund to improve the fund's risk-return potential and further enhance manager diversification within the underlying fixed income pools.

The market aggressively priced in future interest rate

As at June 30, 2022
