Manager Commentary

Riskier global assets rebounded in November 2020 amid positive COVID-19 vaccine news, increased clarity of U.S. election results and positive third-quarter earnings reports. Despite the resurgence of COVID-19 cases and underwhelming employment data, U.S. equities hit record-highs in November, posting strong gains. Spreads in U.S. leveraged loans tightened amid larger gains for equities, as investor sentiment was supported by President-elect Joe Biden's market-friendly cabinet picks and encouraging COVID-19 vaccine announcements. Opportunity for further narrowing of spreads and a decline in retail outflows helped to lift investor appetite for the asset class.

developments related to a second round of fiscal stimulus in the U.S., the U.K.'s exit negotiations from the European Union, and global vaccine distribution plans. The manager believes the current backdrop will persist, particularly as the new issues market heads into a seasonal lull and demand for loans and bonds remains strong. The global economy is expected to return to normalcy in 2021. The manager continues to emphasize cross-platform collaboration to generate attractive economics and allocations relative to the market, and seeks opportunities across multiple credit sectors and geographies.

Moving forward, the manager will closely monitor
