

Manager profile

DoubleLine® is an independent, employee-owned money management firm founded in 2009. The firm offers a wide array of investment strategies run by experienced portfolio managers, employing active risk management, in-depth research and innovative product solutions. DoubleLine portfolio managers have been working together on average over 15 years. DoubleLine believes that the longer the team has worked together, the more consistent its philosophy and process become over multiple market cycles.

Investment philosophy

DoubleLine was founded with the goal of delivering **better risk-adjusted** returns to the client. Achieving this objective depends, in part, on the avoidance of unnecessary risk taking. DoubleLine believes it should not sacrifice returns for growth. The firm emphasizes the importance of security selection, trade execution, portfolio construction, sector allocation, resourcing of the firm's personnel and systems, and ultimately the ownership structure of DoubleLine itself. Employee ownership reinforces the stability of the investment team and its accountability; the firm's interests are aligned with its clients.

Fixed Income Asset Allocation Investment Process

Economic discussions

- Fixed Income Asset Allocation Committee (FIAA) meets monthly. Account reviews and market sector chartbook are evaluated
- The portfolio review book contains portfolio return analysis, positioning, characteristics and risk measures
- The chartbook graphically depicts economic indicators, historical asset class spreads and valuations, and relative growth trends in the global fixed income marketplace

Investment outlook

- Macro economic group discussion of interest rates, currencies, commodities, yield curve, spreads and general fixed income market analysis
- Sectors with opportunities are identified based on the portfolio manager's assessment of their respective sector's outlook and sector attractiveness relative to other asset classes
- Strategy risks are reviewed

Implementation

- Collaborative approach to allocation decisions with final decision made by the chairman
- Sector teams review client guidelines and are responsible for security selection
- The Fixed Income Asset Allocation team monitors implementation and performs portfolio analytics
